1	OVERVIEW OF THE WATER SECTOR IN KSA.....	1-1
1.1	<i>Introduction</i>	1-1
1.2	<i>Available Water Resources</i>	1-3
1.3	<i>Stakeholders and Water Management in KSA</i>	1-4
1.3.1	Stakeholders	1-4
1.3.2	Service provision	1-4
1.3.3	Tariffs	1-5
1.4	<i>Water Resources</i>	1-6
1.4.1	Seawater desalination	1-6
1.4.2	Non-renewable groundwater	1-10
1.4.3	Renewable water	1-14
1.4.4	Reclaimed water	1-19
1.5	<i>Water Use Interaction with Water Resources</i>	1-23
1.5.1	Municipal water use	1-23
1.5.2	Agricultural water use	1-25
1.5.3	Industrial water use	1-29
1.6	<i>Water Budget Estimation</i>	1-30
1.7	<i>Supply Side Options for Water Sector</i>	1-33
2	WATER QUALITY, SECURITY AND ENVIRONMENTAL AND SOCIAL IMPACTS	2-1
2.1	<i>Water Quality</i>	2-1
2.1.1	Groundwater quality	2-1
2.1.2	Seawater quality	2-3
2.2	<i>Environmental and Social Considerations</i>	2-3
2.3	<i>Security of Water Supply</i>	2-3
2.3.1	Water security –definition and concept	2-4
2.3.2	Water security framework – key dimensions	2-5
2.4	<i>Vulnerability to Climate Change</i>	2-7
2.5	<i>Water Security at the Country Level</i>	2-8
2.5.1	Water resource availability	2-8
2.5.2	Renewable water resources	2-8
2.5.3	Non-renewable groundwater	2-8
2.5.4	Desalination water	2-9
2.5.5	Reclaimed water	2-9
2.5.6	The water – food–energy nexus	2-9
2.5.7	Security of municipal supply	2-12
2.6	<i>Assessment of Security in Water Supply</i>	2-13
2.6.1	Water resource diversity	2-13
2.6.2	Water treatment reliability and efficiency	2-16

2.6.3	Desalinated water treatment	2-16
2.6.4	Groundwater treatment.....	2-16
2.6.5	Water transmission reliability, redundancy, and operational flexibility	2-17
2.6.6	Water storage and autonomy	2-18
2.6.7	Emergency preparedness	2-20
2.6.8	Level of services and tariffs	2-20
2.6.9	Water regulation and management.....	2-21
3	ESTIMATION OF MUNICIPAL WATER CONSUMPTION	3-1
3.1	<i>Introduction and Context</i>	3-1
3.1.1	Municipal water consumption per capita	3-1
3.1.2	Municipal water tariffs	3-2
3.2	<i>Residential Water Consumption</i>	3-4
3.2.1	Consumption benchmarking.....	3-4
3.2.2	Estimation approaches.....	3-6
3.2.3	Per capita water consumption and household size	3-7
3.2.4	Per capita irrigation and household size	3-8
3.3	<i>Non-Residential Water Consumption</i>	3-10
3.3.1	Hotels water consumption	3-11
3.3.2	Restaurants water consumption.....	3-59
3.3.3	Cafe water consumption.....	3-71
3.3.4	Office water consumption	3-78
3.3.5	Wholesale and retail trade water consumption	3-88
3.3.6	Schools water consumption	3-93
3.3.7	University water consumption	3-100
3.3.8	Hospital water consumption	3-108
3.3.9	Mosque water consumption.....	3-118
4	MATHEMATICAL MODELS IN MUNICIPAL WATER CONSUMPTION	4-2
4.1	<i>Introduction</i>	4-2
4.2	<i>Residential Water Consumption Models</i>	4-4
4.2.1	Residential water consumption unitary ratio parameters	4-4
4.2.2	Residential water consumption model assumptions	4-4
4.2.3	Daily residential water consumption equations	4-5
4.3	<i>Non-Residential Water Consumption Models</i>	4-8
4.3.1	Hotels	4-8
4.3.2	Restaurants	4-23
4.3.3	Cafe	4-49
4.3.4	Office.....	4-64
4.3.5	Wholesale and retail.....	4-72
4.3.6	Schools	4-80
4.3.7	University.....	4-95
4.3.8	Hospital.....	4-110

4.3.9	Mosques.....	4-124
5	MATHEMATICAL MODELS APPLICATION IN MUNICIPAL WATER DEMAND IN KSA	5-1
5.1	Introduction	5-1
5.2	Population Forecast	5-2
5.2.1	Approach	5-2
5.2.2	Methodology.....	5-10
5.3	Existing Population for KSA	5-12
5.3.1	CDSI population projection	5-13
5.3.2	CDSI assumptions.....	5-14
5.3.3	Base year population	5-15
5.3.4	Fertility	5-15
5.3.5	Mortality	5-17
5.3.6	International migration	5-17
5.4	Total number of Housing Units, Average Household Size and Forecast in KSA.....	5-22
5.4.1	Total number of housing units.....	5-22
5.4.2	Average household size	5-23
5.4.3	Household forecast.....	5-24
5.5	Water Demand Forecast Model	5-24
5.5.1	Factors affecting water demand	5-25
5.5.2	Water demand approach	5-26
5.5.3	Main assumptions	5-27
5.5.4	Data source and assumption	5-28
5.5.5	Climatological data	5-28
5.5.6	Methodology.....	5-29
5.6	Municipal Water Demand Forecast in KSA	5-30
5.6.1	Riyadh region	5-31
6	CONCLUSION	6-1
6.1	General conclusion	6-1
6.2	Objectives achieved.....	6-2
6.3	Particular conclusion focused on KSA	6-2
6.4	Future development	6-3

Table 4 - 62 Unitary office water consumption based on floor area, when cooling and heating area (CHA) and irrigation area (IA) are known.....	4-70
Table 4 - 63 Unitary office water consumption based on floor area, when cooling and heating area (CHA) and irrigation area (IA) are unknown.....	4-71
Table 4 - 64 Contribution of water consumption micro-components in wholesale and retails. Average figures and benchmarks.	4-73
Table 4 - 65 Unitary wholesale and retail trade water consumption based on floor area, when cooling and heating area (CHA) and irrigation area (IA) are known.....	4-74
Table 4 - 66 Ratio of wholesale and retail trade water consumption based on floor area, when cooling and heating area (CHA) and irrigation area (IA) are known.....	4-75
Table 4 - 67 Unitary wholesale and retail trade water consumption based on floor area, when cooling and heating area (CHA) and irrigation area (IA) are unknown.....	4-75
Table 4 - 68 Unitary wholesale and retail trade water consumption based on number of employees, when cooling and heating area (CHA) and irrigation area (IA) are known.....	4-76
Table 4 - 69 Ratio of wholesale and retail trade water consumption based on number of employees, when cooling and heating area (CHA) and irrigation area (IA) are known.....	4-76
Table 4 - 70 Unitary wholesale and retail trade water consumption based on number of employees when cooling and heating area (CHA) and irrigation area (IA) are unknown.....	4-77
Table 4 - 71 Ratio wholesale and retail trade water consumption based on number of employees, when cooling and heating area (CHA) and irrigation area (IA) are unknown.....	4-77
Table 4 - 72 Unitary wholesale and retail trade water consumption based on number of employees, cooling and heating area (CHA) and irrigation are.....	4-79
Table 4 - 73 Contribution of water consumption micro-components in schools. Average figures and benchmarks.....	4-81
Table 4 - 74 Unitary schools water consumption based on floor area, when cooling and heating area (CHA) and irrigation area (IA) are known.....	4-82
Table 4 - 75 Ratio of schools water consumption based on floor area, when cooling and heating area (CHA) and irrigation area (IA) are known.....	4-83

Table 4 - 76 Unitary schools water consumption based on floor area when cooling and heating area (CHA) and irrigation area (IA) are unknown.....	4-85
Table 4 - 77 Unitary schools water consumption based on number of students, when cooling and heating area (CHA) and irrigation area (IA) are known.....	4-87
Table 4 - 78 Ratio of schools water consumption based on number of students, when cooling and heating area (CHA) and irrigation area (IA) are known.....	4-88
Table 4 - 79 Unitary schools water consumption based on number of students, when cooling and heating area (CHA) and irrigation area (IA) are unknown.....	4-90
Table 4 - 80 Ratio of schools water consumption based on number of students, when cooling and heating area (CHA) and irrigation area (IA) are unknown.....	4-91
Table 4 - 81 Unitary schools water consumption based on number of students, cooling and heating area (CHA) and irrigation area (IA).....	4-93
Table 4 - 82 Contribution of water consumption micro-components in universities. Average figures and benchmarks.....	4-96
Table 4 - 83 Unitary university water consumption based on per capita, when cooling and heating area (CHA) and irrigation area (IA) are known.....	4-97
Table 4 - 84 Ratio of university water consumption based on per capita, when cooling and heating area (CHA) and irrigation area (IA) are known.....	4-98
Table 4 - 85 Unitary university water consumption based on per capita when cooling and heating area (CHA) and irrigation area (IA) are unknown.....	4-99
Table 4 - 86 Ratio of university water consumption based on per capita, when cooling and heating area (CHA) and irrigation area (IA) are unknown.....	4-99
Table 4 - 87 Unitary university water consumption based on per capita, cooling and heating area (CHA) and irrigation area (IA).	4-101
Table 4 - 88 Unitary university water consumption based on floor area, when cooling and heating area (CHA) and irrigation area (IA) are known.....	4-102
Table 4 - 89 Ratio of university water consumption based on floor area, when cooling and heating area (CHA) and irrigation area (IA) are known.....	4-103
Table 4 - 90 Unitary university water consumption based on floor area, when, when cooling and heating area (CHA) and irrigation area (IA) are unknown.....	4-103
Table 4 - 91 Unitary university water consumption based on number of students, when cooling and heating area (CHA) and irrigation area (IA) are known.....	4-105
Table 4 - 92 Ratio of university water consumption based on number of students, when cooling and heating area (CHA) and irrigation area (IA) are known.....	4-106
Table 4 - 93 Unitary university water consumption based on number of students, when cooling and heating area (CHA) and irrigation area (IA) are unknown.....	4-107
Table 4 - 94 Ratio of university water consumption based on number of students, when cooling and heating area (CHA) and irrigation area (IA) are unknown.....	4-107
Table 4 - 95 Unitary university water consumption based on number of students, cooling and heating area (CHA) and irrigation area (IA).....	4-109
Table 4 - 96 Contribution of water consumption micro-components in hospitals. Average figures and benchmarks.....	4-111
Table 4 - 97 Unitary hospital water consumption based on per capita, when cooling and heating area (CHA) and irrigation area (IA) are known.....	4-112
Table 4 - 98 Ratio of hospital water consumption based on per capita, when cooling and heating area (CHA) and irrigation area (IA) are known.....	4-113
Table 4 - 99 Unitary hospital water consumption based on per capita, when cooling and heating area (CHA) and irrigation area (IA) are unknown.....	4-114
Table 4 - 100 Ratio of hospital water consumption based on per capita, when cooling and heating area (CHA) and irrigation area (IA) are unknown.....	4-114
Table 4 - 101 Unitary hospital water consumption based on per capita, cooling and heating area (CHA) and irrigation area (IA).	4-116
Table 4 - 102 Unitary hospital water consumption based on floor area, when cooling and heating area (CHA) and irrigation area (IA) are known.....	4-117
Table 4 - 103 Ratio of hospital water consumption based on floor area, when cooling and heating area (CHA) and irrigation area (IA) are known.....	4-118
Table 4 - 104 Unitary hospital water consumption based on floor area, when cooling and heating area (CHA) and irrigation area (IA) are unknown.....	4-118

Table 4 - 105 Unitary hospital water consumption based on number of beds, when cooling and heating area (CHA) and irrigation area (IA) are known.....	4-119
Table 4 - 106 Ratio of hospital water consumption based on number of beds, when cooling and heating area (CHA) and irrigation area (IA) are known.....	4-120
Table 4 - 107 Unitary hospital water consumption based on number of beds, when cooling and heating area (CHA) and irrigation area (IA) are unknown.....	4-121
Table 4 - 108 Ratio of hospital water consumption based on number of beds, when cooling and heating area (CHA) and irrigation area (IA) are unknown.....	4-121
Table 4 - 109 Unitary hospital water consumption based on number of beds, cooling and heating area (CHA) and irrigation area (IA).....	4-123
Table 4 - 110 Contribution of water consumption micro-components in mosques. Average figures and benchmarks.....	4-124
Table 4 - 111 Unitary mosque water consumption-based number of mosques (NM), cooling and heating area (CHA) and irrigation area (IA).....	4-126
Table 4 - 112 Unitary mosque water consumption based on number of mosques(NM), when cooling and heating area (CHA) and irrigation area (IA) are unknown.....	4-127
Table 4 - 113 Ratio of mosque water consumption based on number of mosques(NM), when cooling and heating area (CHA) and irrigation area (IA) are unknown.....	4-127
Table 4 - 114 Unitary mosque water consumption based on worshippers, cooling and heating area (CHA) and irrigation area (IA)....	4-129
Table 4 - 115 Ratio of mosque water consumption based on number of worshippers, when cooling and heating area (CHA) and irrigation area (IA) are known.....	4-129
Table 4 - 116 Unitary mosque water consumption based on number of worshippers, cooling and heating area (CHA) and irrigation area (IA) are unknown.....	4-130
Table 4 - 117 Ratio of mosque water consumption based on number of worshippers, when cooling and heating area (CHA) and irrigation area (IA) are unknown.....	4-130
Table 5 - 1 KSA, major demographic indicators.....	5-4
Table 5 - 2 KSA, list of administrative area from census.....	5-5
