Abstract	v
Acknowledgments	xi
1 Introduction	1
1.1 The Climate Crisis	1
1.2 Halide Perovskite Solar Cells	4
1.2.1 Perovskite structure and properties	4
1.2.2 Solar cell architecture	7
1.2.3 Open questions	10
1.2.4 Outlook	14
1.3 Methods	22
1.3.1 Experimental techniques	22
1.3.2 Computational simulations	26
1.4 Thesis Motivation and Objectives	27
1.5 Bibliography	29
2 Publications	57
2.1 Inorganic-Perovskites: Improved Film and Crystal Quality of CsPbIBr ₂ when Doped with Rubidium	57
2.1.1 Introduction	61
2.1.2 Methodology	62
2.1.3 Results and Discussion	63
2.1.4 Conclusion	68
2.1.5 Acknowledgments	69
2.1.6 Bibliography	69
2.1.7 Supplementary Materials	74
2.2 Enhancing the stability and crystallinity of CsPbIBr ₂ through antisolvent engineering	78
2.2.1 Introduction	83
2.2.2 Methodology	84
2.2.3 Results	86
2.2.4 Discussion	97
2.2.5 Conclusion	100
2.2.6 Acknowledgments	102
2.2.7 Bibliography	102
2.2.8 Supplementary Materials	109
2.2.9 Bibliography	112

2.3	Shedding light on electronically doped perovskites	115
2.3.1	Introduction	119
2.3.2	Results	120
2.3.3	Methods and insights for electronically doping PSCs: .	130
2.3.4	Conclusion:	132
2.3.5	Acknowledgments:	133
2.3.6	Bibliography	134
2.3.7	Supplementary Materials	144
2.3.8	Bibliography	151
3	Discussion	163
3.1	Bibliography	165
4	Conclusion	169
4.1	Future work	171
