
1. INTRODUCTION.....	1
1.1. WATER FRAME DIRECTIVE	1
1.2. MONITORING IN THE SCOPE OF WFD	4
1.2.1. <i>Monitoring</i>	4
1.2.2. <i>Types of monitoring in the scope of WFD</i>	4
1.2.3. <i>Mediterranean networks</i>	7
1.3. INTERCALIBRATION.....	9
1.3.2. <i>Mediterranean GIG</i>	10
1.3.3. <i>Coastal waters Eutrophication</i>	15
1.4. MONITORING STRATEGIES.....	17
1.5. AIMS OF THE STUDY.....	23
2. STUDY AREA.....	24
2.1. MEDITERRANEAN SEA	24
2.2. COASTAL WATERS OF VALENCIA.....	28
2.2.1. <i>Introduction</i>	28
2.2.2. <i>Hydrographic basins</i>	28
2.2.3. <i>Coastal waters</i>	29
2.2.4. <i>Coastal water bodies</i>	31
3. METHODS AND SOURCE OF DATA	36
3.1. MONITORING NETWORKS THAT PROVIDES DATA FOR THE VALENCIAN COASTAL WATERS	36
3.1.1. <i>Coastal waters monitoring network</i>	36
3.1.2. <i>Pluviometric Jucar river basin network</i>	41
3.1.3. <i>Wave data networks</i>	42
3.2. ANALYTICAL METHODS	44
3.2.1. <i>Coastal waters monitoring network established for the WFD</i>	44
3.2.2. <i>Pluviometric Jucar river basin network</i>	44
3.2.3. <i>Wave buoy networks established by Puertos de Estado</i>	45
3.3. PROVISIONAL ECOLOGICAL CLASSIFICATIONS	46
3.3.1. <i>Provisional ecological classification status August 2005- July 2008</i>	47
3.3.2. <i>Provisional ecological classification status for one year periods</i>	49
3.4. TEMPORAL REDUCTION	52
3.4.1. <i>Effects of a reduction in the frequency of campaigns on the ecological classification</i> 52	
3.4.2. <i>Seasonal pattern</i>	53
3.4.3. <i>Instability in the ecological classification</i>	54
3.5. SPATIAL REDUCTION.....	56
3.5.1. <i>Effects of a reduction in the number of sampling stations reviewed on the ecological classification</i>	56
3.5.2. <i>Selecting the best observers</i>	60
3.5.3. <i>Post reduction Management</i>	63
3.6. CALCULATING THE 90TH PERCENTILE.....	65
4. TEMPORAL REDUCTION ANALYSIS.....	68
4.1. TEMPORAL REDUCTION DATA ANALYSIS - EXPLORATORY STUDY	68
4.1.1. <i>Three-year period data analysis</i>	68
4.1.2. <i>One-year periods, reduced campaigns</i>	74
4.1.3. <i>Discussion</i>	88
4.2. SEASONAL PATTERN REGULARITY.....	89
4.2.1. <i>Valencian Community seasonal patterns</i>	90
4.2.2. <i>Discussion</i>	115
4.3. ECOLOGICAL CLASSIFICATION FUZZINESS	117

4.3.2.	<i>Water bodies selected by previous results and reduction conditions</i>	120
4.3.3.	<i>Water bodies not selected by previous results</i>	131
4.3.4.	<i>Discussion</i>	134
5.	SPATIAL REDUCTION	137
5.1.	EXPLORATORY STUDY	137
5.1.1.	<i>Introduction</i>	137
5.1.2.	<i>Water body 001</i>	141
5.1.3.	<i>Water body 002</i>	143
5.1.4.	<i>Water body 005</i>	146
5.1.5.	<i>Water body 008</i>	148
5.1.6.	<i>Water body 009</i>	151
5.1.7.	<i>Water body 010</i>	153
5.1.8.	<i>Water body 011</i>	156
5.1.9.	<i>Water body 014</i>	159
5.1.10.	<i>Water body 019</i>	161
5.1.11.	<i>Discussion</i>	164
5.2.	SELECTING THE MOST APPROPRIATE K-OBSERVERS	165
5.2.1.	<i>Introduction</i>	165
5.2.2.	<i>Analysis and results</i>	167
5.2.3.	<i>Discussion</i>	246
5.3.	VIRTUAL SIMULATION OF CHLOROPHYLL A CONCENTRATION AND POST REDUCTION MANAGEMENT	248
5.3.1.	<i>Introduction</i>	248
5.3.2.	<i>Water body 001</i>	249
5.3.3.	<i>Water body 002</i>	253
5.3.4.	<i>Water body 005</i>	257
5.3.5.	<i>Water body 008</i>	261
5.3.6.	<i>Water body 009</i>	265
5.3.7.	<i>Water body 010</i>	266
5.3.8.	<i>Water body 011</i>	270
5.3.9.	<i>Water body 014</i>	274
5.3.10.	<i>Water body 019</i>	277
5.3.11.	<i>Discussion</i>	280
