List of Figures	xv
List of Tables	xvii
Abbreviations and Acronyms	xix
1 Introduction	1
1.1 Background on Parallel Computing Architectures	2
1.1.1 Message-passing Communication Model	3
1.1.2 Shared Memory Architectures	3
1.1.3 Multicore Processors	6
1.1.4 Cluster Computers	6
1.2 Motivation	7
1.3 Objectives of the Thesis	9
1.4 Contributions of the Thesis	10
1.5 Thesis Outline	11
2 Related Work	13
2.1 Introduction	14
2.2 Proposals Focusing on the Use of Remote Memory for Swapping	14
2.3 Proposals Focusing on Estimating Memory System Performance	18
2.4 Proposals on Memory System Aware Scheduling	20
2.5 Summary	21
3 System Model and Experimental Framework	23
3.1 Target System	24
3.1.1 Cluster	24
3.1.2 Standard HyperTransport	25
3.1.3 Connecting Motherboards to Access Remote Memory	25
3.2 System Model	26
3.2.1 System Model Characteristics	26
3.2.2 Memory Regions	26
3.2.3 Memory Scheduling	27
3.3 Workloads	28

3.3.1	Stream	28
3.3.1.1	Determining the Stream Array Size	29
3.3.2	SPLASH-2	30
3.3.2.1	Describing the Selected SPLASH2 Benchmarks and their Problem Sizes	32
3.3.3	SPEC CPU2006	34
3.4	Simulation Tool	36
3.4.1	Multi2Sim	36
3.4.1.1	Simulation Features	37
3.4.2	Simulation Tool Extensions	40
3.5	Summary	42
4	Scheduling Policy based on a Cost-effective Heuristic	43
4.1	Analysis and Impact on Performance of Memory Distribution	45
4.2	Concurrent Execution of Several Applications	46
4.2.1	Quality of Service Definition	48
4.2.2	Two Concurrent Applications	49
4.2.2.1	Complete Usage of Remote Memory	49
4.2.2.2	Partial Usage of Remote Memory	52
4.2.3	Extending the Analysis to More Applications	54
4.3	Proposed Memory Scheduler	57
4.3.1	<i>SPP</i> Remote Memory Scheduler	57
4.3.2	Remote Memory Scheduling Heuristic	60
4.3.2.1	Working Examples	62
4.3.2.2	Cost Analysis	63
4.3.3	Local Memory Assignment	64
4.4	Summary	64
5	Scheduling Policy based on a Performance Predictor	67
5.1	Performance Model	69
5.1.1	Analytical Model	69
5.1.2	Estimating Performance	71
5.2	Validating the Model	72
5.3	Summary	73
6	Scheduling Policy based on page granularity	75
6.1	Memory Allocation Granularity and Memory Interleaving	77
6.2	Proposed Page-granularity Policies	77
6.3	Performance Analysis of the Interleaved Memory Schemes	78
6.4	On-demand Memory Allocation	82
6.5	Mail Memory Allocation	86
6.6	Summary	90
7	Conclusions	91

7.1	Contributions	92
7.2	Future Work	94
7.3	Publications	96
