Resumen ..... **i**

Resum ..... **iii**

Abstract ..... **v**

Contents ..... **vii**

1. Introduction **1**
1.1. Silicon photonics 1
1.2. Electro-optic modulation in silicon 6
1.2.1. Optical modulators 6
1.2.2. Modulation in silicon: the plasma dispersion effect 8
1.2.3. Phase modulation: electrical structures 8
1.2.4. Intensity modulation: Mach-Zehnder Interferometer (MZI) 11
1.3. Development process of photonic structures 14
1.3.1. Design 14
1.3.2. Mask generation 15
1.3.3. Fabrication 16
1.3.4. Characterization 17
1.4. Objectives and outline of the thesis 17

2. Digital applications **19**
2.1. Introduction: state-of-art of plasma dispersion effect-based MZI 19
2.2. Micro-ring resonator structures 23
2.2.1. Introduction: state-of-art 24
2.2.2. Micro-ring resonator-based (MRR) modulators 25
2.2.2.1. Basic principle of MRR modulators 25
2.2.2.2. Experimental MRR modulator 31
2.2.3. Ring-assisted MZI (RAMZI) modulators 37
2.2.3.1. Operation principles of RAMZI modulators 37
2.2.3.2. Experimental RAMZI modulator 39
2.3. Slow-wave structures 44
2.3.1. Introduction: state-of-art 46
2.3.2. Theory of slow-wave effect 48
2.3.2.1. Basic concepts of slow-light effect 48
2.3.2.2. Basic operation principle of slow-light effect 49
2.3.2.3. Corrugated slow-light waveguide design 51

2.3.3. Experimental slow-light MZI (SL-MZI) modulators 55
2.3.3.1. High-speed SL-MZI modulator 55
2.3.3.2. Low-drive voltage SL-MZI modulator 59
2.3.4. Method for obtaining propagation losses 62
2.3.4.1. Rib waveguides 62
2.3.4.2. Corrugated waveguides 68
2.4. Active RF characterization set-ups 71
2.4.1. Data transmission measurements 71
2.4.2. Small signal measurements 73

3. Analog applications 75
3.1. Introduction: Microwave photonics 75
3.2. Analytical model for silicon-based MZIs nonlinear distortion 79
3.2.1. Introduction: state-of-art 79
3.2.2. Electro-optic MZI modulator linearity 81
3.2.3. Analytical model development 85
3.2.4. Experimental validation of the model 93
3.3. Frequency mixing application 101
3.3.1. Introduction: state-of-art 101
3.3.2. Basic principle of RF/photonic mixers 102
3.3.3. Experimental slow-wave photonic mixer 104
3.4. Microwave photonic filtering application 111
3.4.1. Introduction: state-of-art 112
3.4.2. Basic principle of microwave photonic filters 113
3.4.3. Experimental microwave photonic filter 117
3.5. Active RF characterization set-ups 122
3.5.1. Distortion products measurements 122
3.5.2. Filter response measurements 125

4. Conclusions and future outlook 127

Appendix A: Horizontal & vertical coupling and passive characterization 131
A.1. Horizontal coupling 131
A.2. Vertical coupling 134
