

**CONTENTS**

**Acknowledgements** **XV**

**Abstract** **XVII**

**1 Thesis Overview** **1**

    1.1 Introduction . . . . . 1

    1.2 Offshore Wind Farms . . . . . 3

        1.2.1 Offshore wind turbine technologies . . . . . 5

        1.2.2 Offshore power transmission . . . . . 8

        1.2.3 Technical feasibility of diode based HVdc transmission . . . . . 13

    1.3 Research Approach . . . . . 14

        1.3.1 Thesis goal and objectives . . . . . 15

    1.4 Thesis Outline . . . . . 15

**2 System Modelling** **17**

    2.1 Introduction . . . . . 17

    2.2 Wind Turbine Modelling . . . . . 18

        2.2.1 Aerodynamic model . . . . . 19

        2.2.2 Mechanical model . . . . . 20

        2.2.3 Electrical model . . . . . 21

2.3	Offshore Wind Farm Modelling . . . . .	25
2.3.1	Aggregated model of an offshore wind farm . . . . .	25
2.3.2	Distributed model of an offshore wind farm . . . . .	29
2.3.3	Clustered model of an offshore wind farm . . . . .	31
2.4	Diode Based HVdc-Link Modelling . . . . .	33
2.4.1	Offshore capacitor and filter bank . . . . .	34
2.4.2	Offshore diode-based rectifier . . . . .	36
2.4.3	HVdc link reactance and cable model . . . . .	37
2.4.4	Onshore LCC-HVdc inverter . . . . .	38
2.5	Summary . . . . .	40
<b>3</b>	<b>Overview of the Offshore Wind Farm Control Strategy</b>	<b>43</b>
3.1	Introduction . . . . .	43
3.2	Wind Turbine Control Tasks . . . . .	44
3.2.1	Speed control . . . . .	44
3.2.2	Back-to-back dc-link voltage control . . . . .	47
3.3	Wind Turbine Grid Integration Tasks . . . . .	48
3.3.1	Modes of operation . . . . .	49
3.4	Summary . . . . .	54
<b>4</b>	<b>Control of the Aggregated Offshore Wind Farm</b>	<b>57</b>
4.1	Introduction . . . . .	57
4.2	Wind Turbine Control . . . . .	58
4.2.1	Wind turbine speed control . . . . .	59
4.2.2	PMSG current control . . . . .	64
4.2.3	Back to back converter dc-link voltage control . . . . .	67
4.2.4	Wind turbine control performance . . . . .	69
4.3	Wind Turbine Grid Integration . . . . .	71
4.3.1	Front-end converter current control . . . . .	72
4.3.2	Offshore ac-grid voltage control . . . . .	75
4.3.3	Offshore ac-grid frequency control . . . . .	78
4.3.4	Protection Strategy and Fault Ride Through Capability . . . . .	80

4.4	Stability Analysis . . . . .	83
4.4.1	Stability analysis in connected operation mode . . . . .	83
4.4.2	Stability analysis in islanded operation mode . . . . .	106
4.5	Results . . . . .	113
4.5.1	Offshore ac-grid and HVdc link start-up operation . . . . .	114
4.5.2	Response to frequency changes at rated power . . . . .	115
4.5.3	Wind farm power control . . . . .	119
4.5.4	Fault-ride-through performance during onshore faults . . . . .	122
4.5.5	Voltage and frequency control during rectifier ac-breaker operation . . . . .	127
4.6	Summary . . . . .	129
<b>5</b>	<b>Distributed Control of the Offshore Wind Farm</b>	<b>131</b>
5.1	Introduction . . . . .	131
5.2	Grid Integration of the $j^{th}$ cluster . . . . .	133
5.2.1	Current control of the $j^{th}$ cluster model . . . . .	133
5.2.2	Distributed voltage and frequency control . . . . .	136
5.3	Stability Analysis . . . . .	140
5.4	Results . . . . .	158
5.4.1	Islanded operation (operation mode A) . . . . .	158
5.4.2	Connected operation . . . . .	164
5.4.3	Transient performance . . . . .	167
5.5	Summary . . . . .	174
<b>6</b>	<b>Conclusions and Future Works</b>	<b>177</b>
6.1	Conclusions . . . . .	177
6.1.1	More relevant information . . . . .	177
6.1.2	More relevant contributions . . . . .	179
6.2	Future Works . . . . .	180
	<b>Bibliography</b>	<b>181</b>
