Introduction	1
0 Preliminaries	9
0.1 Notation and basic definitions	9
0.2 Weighted Banach spaces of holomorphic functions	14
0.3 Weighted spaces of entire functions on Banach spaces	17
0.4 Arens and Aron-Berner extensions.	22
0.5 An introduction to linear dynamics	24
0.5.1 Linear dynamics on locally convex spaces.	26
1 Spectra of weighted (LB)-algebras of entire functions on Banach spaces	31
1.1 Weighted algebras of holomorphic functions	32
1.2 Algebra homomorphisms between weighted algebras.	38
1.3 The spectrum	46

2	Linearization of weighted (LB)-spaces of entire functions	57
2.1	Preduals and biduality of weighted spaces of entire functions . . .	57
2.1.1	Predual of $VH(X)$	57
2.1.2	Biduality of $VH_0(X)$	60
2.2	Linearization of weighted spaces of entire functions	62
2.3	Linearization of spaces of vector-valued functions	67
2.4	Extensions of functions in spaces of holomorphic functions	69
2.4.1	Extensions of functions in inductive and projective limits of dual Banach spaces	69
2.4.2	Extensions of functions in inductive and projective limits of general Banach spaces	73
3	Dynamics of operators on weighted spaces of entire functions	77
3.1	Notation and Preliminaries	78
3.2	The integration operator	87
3.3	The differentiation operator	94
3.4	The Hardy operator	105
3.5	Differential operators	107
3.6	Dynamics of D and J on $H_v^0(\mathbb{C})$ and $H_v(\mathbb{C})$	110
3.7	A topologically mixing and mean ergodic operator	114
4	Classical operators on the Hörmander algebras	119
4.1	Notation and Preliminaries	119
4.2	The differentiation operator	122
4.3	The integration operator	128
	Bibliography	133
