Contents	xxi
1 General Introduction	1
1.1 Embryo Cryopreservation	1
1.2 Methods for embryo cryopreservation	1
1.2.1 Slow freezing	1
1.2.2 Vitrification	2
1.3 Cryopreservation damage	3
1.4 Evaluation of cryoinjuries	4
1.4.1 <i>In vitro</i> embryo development	4
1.4.2 <i>In vivo</i> embryo development	5
1.4.3 Gene expression profile	5
1.4.4 Protein expression profile	7
1.5 References	7
2 Objectives	13
3 Chapter I - Effects of slow freezing procedure on late blastocyst gene expression and survival rate in rabbit	17
3.1 Introduction	19
3.2 Material and Methods	20
3.2.1 Animals	20
3.2.2 Experimental design	20
3.2.3 Embryo collection	21
3.2.4 Freezing and thawing procedures	21
3.2.5 Embryo transfer by laparoscopy	21
3.2.6 Embryonic development, implantation and delivery rates	22
3.2.7 RNA extraction, amplification and sample labeling	22
3.2.8 Hybridization, washing and scanning of microarrays	23
3.2.9 Microarray data analysis	23
3.2.10 qPCR	24
3.2.11 Statistical analysis	26
3.3 Results	26
3.3.1 Evaluation of in vivo development ability at day 6, day 15 and birth	26

3.3.2	Evaluation of differential gene expression after slow freezing and transfer procedures	27
3.3.3	Microarray data validation through qPCR for selected genes	33
3.4	Discussion	34
3.5	References	36
4	Chapter II - Rabbit morula vitrification reduces early foetal growth and increases losses throughout gestation	43
4.1	Introduction	45
4.2	Material and Methods	46
4.2.1	Animals	46
4.2.2	Embryo collection	46
4.2.3	Vitrification and warming procedures	47
4.2.4	Embryo transfer by laparoscopy	48
4.2.5	Embryonic development, implantation and delivery rates	48
4.2.6	Ultrasound examination	48
4.2.7	RNA extraction and qPCR	49
4.2.8	Statistical analysis	50
4.3	Results	52
4.3.1	Evaluation of in vivo development ability at day 6, day 14 and birth	52
4.3.2	Evaluation of differential gene expression after vitrification and transfer procedures	53
4.4	Discussion	53
4.5	References	56
5	Chapter III - Direct comparison of the effects of slow freezing and vitrification on late blastocyst gene expression, development, implantation and offspring of rabbit morulae	63
5.1	Introduction	65
5.2	Material and Methods	66
5.2.1	Animals	66
5.2.2	Experimental design	66
5.2.3	Embryo collection	67
5.2.4	Freezing and thawing procedures	68
5.2.5	Vitrification and warming procedures	68
5.2.6	Embryo transfer by laparoscopy	68
5.2.7	Embryonic development, implantation and delivery rates	69
5.2.8	RNA extraction, amplification and sample labeling	69
5.2.9	Hybridization, washing and scanning of microarrays	69

5.2.10	Microarray data analysis	70
5.2.11	qPCR	70
5.2.12	Statistical analysis	71
5.3	Results	73
5.3.1	Evaluation of in vivo development ability at day 6, day 14 and birth	73
5.3.2	Evaluation of differential gene expression after slow freezing, vitrification and transfer procedures	73
5.4	Discussion	74
5.5	References	76
6	Chapter IV - Vitrification alters rabbit foetal placenta at transcriptionic and proteomic level	83
6.1	Introduction	85
6.2	Material and Methods	85
6.2.1	Animals	86
6.2.2	Experimental design	86
6.2.3	Embryo collection	86
6.2.4	Vitrification and warming procedures	86
6.2.5	Embryo transfer by laparoscopy	87
6.2.6	Embryonic development, implantation and delivery rates	88
6.2.7	RNA extraction	88
6.2.8	Amplification and sample labeling	89
6.2.9	Hybridization, washing and scanning of microarrays	89
6.2.10	Microarray data analysis	89
6.2.11	qPCR	90
6.2.12	Protein extraction and quantification	90
6.2.13	Fluorescent protein labelling and 2D DIGE analysis	91
6.2.14	Protein identification	91
6.2.15	Statistical analysis	92
6.3	Results	94
6.3.1	Vitrification causes detrimental effects on rabbit embryo and foetal development with two major peaks of losses: one before and the other after the implantation	94
6.3.2	Foetal growth and maternal placenta are reduced in vitrified foetus in the following days after implantation	94
6.3.3	The weight at birth was higher in vitrified embryos	95
6.3.4	Vitrification process alters gene expression profile of foetal placentas (day 14), but not pre-implantatory late blastocyst transcriptome (day 6)	95

6.3.5	Functional annotation of up regulated genes in foetal placentas . . .	100
6.3.6	qPCR validated microarray results	102
6.3.7	Differential expression of serotransferrin are also observed at protein level	104
6.4	Discussion	107
6.5	References	111
7	Chapter V - Proteomic changes at the end of gestation in rabbit foetal placenta derived from vitrified embryos	119
7.1	Introduction	121
7.2	Material and Methods	121
7.2.1	Animals	121
7.2.2	Embryo collection	122
7.2.3	Vitrification and warming procedures	123
7.2.4	Embryo transfer by laparoscopy	123
7.2.5	Protein extraction and quantification	124
7.2.6	Fluorescent protein labelling and 2D-DIGE analysis	124
7.2.7	Protein identification	125
7.2.8	Statistical analysis	126
7.3	Results	126
7.3.1	Effect of vitrification on foetus, foetal and maternal placenta weights	126
7.3.2	Effect of vitrification on 24 day old foetal placenta proteome	126
7.4	Discussion	130
7.5	References	131
8	General Discussion	135
8.1	Evaluation of development and losses distribution throughout gestation of cryopreserved rabbit morulae	135
8.2	Evaluation of gene expression of late blastocyst previously cryopreserved .	136
8.3	Evaluation of vitrification effects on post-implantation development, tran- scriptome and proteome	138
8.4	Long-term effects of vitrification	140
8.5	References	141
9	Conclusions	145
