

# Table of contents

Introduction .....	18
1. <i>Plant-made antibodies.</i> .....	19
2. <i>Plant-made antibodies in the context of oral passive immunization.</i> .....	19
3. <i>Edible plant organs as a platform for production of antibodies and other mucosal therapeutics.</i> .....	21
4. <i>Secretory IgA as a target molecule for oral passive immunotherapy.</i> .....	22
5. <i>Practical considerations for antibody production in plants.</i> .....	24
5.1 <i>Subcellular Localization</i> .....	24
5.2 <i>Glycosylation</i> .....	25
5.3 <i>Antibody Degradation</i> .....	26
6. <i>Passive immunization against rotavirus in edible fruits as a proof of concept.</i> .....	27
7. <i>References</i> .....	30
Objectives.....	35
Chapter 1.....	37
<b>Neutralizing antibodies against rotavirus produced in transgenically labelled purple tomatoes.....</b>	<b>37</b>
1. <i>Introduction</i> .....	38
2. <i>Results</i> .....	40
2.1 <i>Design and selection of human IgA genes for expression in tomato fruits</i> .....	40
2.2 <i>Transgenic fruits accumulate high levels of mAb</i> .....	41
2.3 <i>Anti-VP8* activity is maintained in late ripening fruits in the form of Fab' fragments</i> .....	43
2.4 <i>Minimally processed tomato-based products show strong anti-VP8* activity</i> .....	45
2.5 <i>Minimally processed fruit samples show strong rotavirus neutralization activity</i> .....	47
2.6 <i>Rosea1 and Delila transgenes can be used to confer identity preservation to IgA-expressing tomatoes</i> .....	50
3. <i>Discussion</i> .....	52
4. <i>Experimental procedures</i> .....	57
4.1 <i>DNA constructs and vectors</i> .....	57
4.2 <i>Tomato transformation, plant material and sample preparation</i> .....	58
4.3 <i>VP8* rotavirus surface protein production</i> .....	58

4.4	<b><i>ELISAs for the detection of VP8* binding activity and recombinant immunoglobulin A determination</i></b> .....	59
4.5	<b><i>SDS-PAGE and Western blot analysis</i></b> .....	60
4.6	<b><i>Protein SSL7 affinity purification</i></b> .....	60
4.7	<b><i>Neutralization assays</i></b> .....	60
5.	<b><i>Acknowledgements</i></b> .....	61
6.	<b><i>References</i></b> .....	62
7.	<b><i>Supplementary material</i></b> .....	65
Chapter 2	.....	68
	<b>Evaluation of unintended effects in the composition of tomatoes expressing a human immunoglobulin A against Rotavirus</b> .....	68
1.	<b><i>Introduction</i></b> .....	69
2.	<b><i>Results</i></b> .....	72
2.1	<b><i>Evaluation of IgA content in the fruit.</i></b> .....	72
2.2	<b><i>Identification of differentially expressed proteins in IgA-tomatoes by 2D-DIGE and LC-MSMS</i></b> .....	74
2.3	<b><i>Metabolic profiling for the evaluation of unintended effects by UPLC-MS.</i></b> .....	77
3.	<b><i>Discussion</i></b> .....	85
4.	<b><i>Experimental Procedures</i></b> .....	88
4.1	<b><i>Plant material</i></b> .....	88
4.2	<b><i>Protein extraction, SDS-PAGE, Western blot and ELISA tests</i></b> .....	88
4.3	<b><i>2D DIGE analysis</i></b> .....	89
4.4	<b><i>Protein identification</i></b> .....	89
4.5	<b><i>UPLC-QTOF</i></b> .....	90
4.6	<b><i>Statistical data analysis</i></b> .....	91
5.	<b><i>Acknowledgements</i></b> .....	92
6.	<b><i>References</i></b> .....	93
7.	<b><i>Supplementary material</i></b> .....	96
Chapter 3	.....	99
	<b>Combinatorial analysis of secretory Immunoglobulin A (sIgA) expression in plants</b> .....	99
1.	<b><i>Introduction</i></b> .....	100
2.	<b><i>Results</i></b> .....	102
2.1	<b><i>GoldenBraid-assisted multigene assembly of 16 versions of secretory IgA</i></b> .....	102
2.2	<b><i>Transient expression in <i>Nicotiana benthamiana</i> of 16 versions of sIgA against Rotavirus</i></b> .....	104

<b>2.3 Detailed characterization and purification of the HCα1-LCλ-JC-SCKdel combination.....</b>	<b>107</b>
<b>3. Discussion .....</b>	<b>110</b>
<b>4. Experimental Procedures.....</b>	<b>113</b>
<b>4.1 Cloning and assembly of modular parts .....</b>	<b>113</b>
<b>4.2 Strains and growth conditions .....</b>	<b>114</b>
<b>4.3 Plant transient transformation .....</b>	<b>114</b>
<b>4.4 Plant material and sample preparation .....</b>	<b>114</b>
<b>4.5 VP8* Rotavirus surface protein production .....</b>	<b>114</b>
<b>4.6 ELISAs for the quantification and detection of VP8* binding activity of IgA and slgA</b>	<b>115</b>
<b>4.7 SDS-PAGE and Western blot analysis .....</b>	<b>115</b>
<b>4.8 SSL7 affinity purification .....</b>	<b>116</b>
<b>5. Acknowledgments.....</b>	<b>116</b>
<b>6. References .....</b>	<b>117</b>
<b>7. Supplementary material.....</b>	<b>120</b>
General Discussion .....	121
<b>1. IgA expression levels .....</b>	<b>122</b>
<b>2. Formulation and stability in the mucosa.....</b>	<b>124</b>
<b>3. Safety considerations: Identity preservation and transgenic unintended effects. ....</b>	<b>125</b>
<b>4. Production of slgA in fruits. ....</b>	<b>126</b>
<b>5. Final remarks .....</b>	<b>127</b>
<b>6. References .....</b>	<b>129</b>
Conclusions .....	132
