

## INDEX

Resum .....	
Resumen .....	
Abstract.....	
<b>Chapter 1: Introduction .....</b>	<b>1</b>
1.1. The importance of ants .....	3
1.2. Ants in agricultural ecosystems.....	5
1.2.1. Ants in citrus agroecosytems .....	8
1.3. Mechanisms underlying the increases of the herbivore populations induced by ants.....	11
1.3.1. Sanitation and stimulation of the herbivores.....	11
1.3.2. Interference of ants with the activity of the natural enemies .....	12
1.3.3. A new hypothesis: impact of ants on the physiological state of the natural enemies? .....	15
1.4. Ants in Mediterranean citrus .....	16
1.4.1. Species composition .....	16
1.4.2. Impact on citrus pests.....	21
1.4.3. Impact on natural enemies .....	21
1.5. Justification and objectives.....	22
<b>Chapter 2: Ants affect the infestation levels but not the parasitism of honeydew and non-honeydew producing pests in citrus .....</b>	<b>25</b>
2.1. Introduction.....	29
2.2. Material and Methods .....	33
2.3. Results.....	40
2.4. Discussion.....	52

2.5. Acknowledgements.....	59
<b>Chapter 3: Ants in citrus: impact on the abundance, species richness, diversity and community structure of predators and parasitoids .....</b>	<b>61</b>
3.1. Introduction.....	65
3.2. Material and Methods.....	69
3.3. Results.....	74
3.4. Discussion.....	84
3.5. Acknowledgements.....	92
3.6. Supplementary material .....	92
<b>Chapter 4: Ants impact the energy reserves of natural enemies through the shared honeydew exploitation.....</b>	<b>99</b>
4.1. Introduction.....	103
4.2. Material and Methods.....	108
4.3. Results.....	114
4.4. Discussion.....	121
4.5. Acknowledgements.....	125
<b>Chapter 5: General discussion.....</b>	<b>127</b>
<b>Chapter 6: Conclusions.....</b>	<b>133</b>
<b>References.....</b>	<b>139</b>
