

# INDEX

SUMMARY.....	9
RESUMEN .....	13
RESUM.....	17
1. INTRODUCTION.....	21
1.1. Eukaryotic ribosome biogenesis.....	25
1.1.1. Transcription of rDNA and initiation of processing .....	27
1.1.2. SSU rRNA processing .....	29
1.1.3. LSU rRNA processing.....	29
1.1.4. Elements involved in 60S biogenesis.....	30
1.2. Nop7 sub-complex .....	36
1.2.1. Nop7.....	36
1.2.2. Erb1 .....	38
1.2.3. Ytm1 .....	40
1.2.4. Nop7 sub-complex formation .....	42
1.3. WD40 domain .....	45
2. OBJECTIVES .....	49
3. MATERIAL AND METHODS .....	53
3.1. Cloning .....	55
3.1.1. Preparation of pGKI vector .....	55
3.1.2. Preparation of constructs .....	55
3.2. Generation of cDNA library from <i>Chaetomium thermophilum</i> .....	59

3.3.	Site-directed mutagenesis .....	60
3.4.	Protein expression in <i>Escherichia coli</i> .....	61
3.4.1.	Small-scale expression assays.....	61
3.4.2.	Large-scale expression .....	62
3.5.	Protein expression in insect cells using baculovirus.....	64
3.6.	Protein purification .....	65
3.6.1.	Protein extraction.....	65
3.6.2.	Affinity chromatography of His-tagged proteins. ....	66
3.6.3.	Affinity chromatography of GST-tagged proteins. ....	67
3.6.4.	Affinity chromatography using HiTrap Heparin HD column. ....	67
3.6.5.	Size exclusion chromatography (gel filtration).....	68
3.7.	Protein stability assays.....	68
3.8.	Native gel electrophoresis .....	69
3.9.	Measurement of binding in vitro .....	69
3.9.1.	Poly(U)-agarose beads binding.....	69
3.9.2.	Electrophoretic mobility shift assay (EMSA) .....	70
3.9.3.	Pull-down. ....	70
3.9.4.	Bio-layer Interferometry. ....	70
3.9.5.	Isothermal Titration Calorimetry (ITC).....	71
3.10.	Protein crystallization .....	71
3.10.1.	Crystals of Erb1 <sub>416-807</sub> .....	71
3.10.2.	Crystals of ChErb1 <sub>432-801</sub> -ChYtm1 .....	72
3.11.	Bioinformatics tools used for structure and sequence analyses and representation.....	74
3.12.	Functional assays in <i>S. cerevisiae</i> .....	74
3.12.1.	Yeast strains and plasmids used.....	74
3.12.2.	Yeast transformation .....	75

3.12.3. Protein extraction from yeast.....	75
3.12.4. Immunoblotting.....	76
3.12.5. Polysome profiling.....	76
3.12.6. Ribosomal subunits fractionation .....	77
3.12.7. RNA extraction, northern blot and primer extension.....	77
<b>4. RESULTS.....</b>	<b>79</b>
<b>4.1. Reconstitution of Nop7-Erb1-Ytm1 from <i>S. cerevisiae</i> .....</b>	<b>81</b>
4.1.1. Expression and purification of Erb1 .....	81
4.1.2. Expression and purification of Nop7.....	82
4.1.3. Expression and purification of Ytm1.....	82
4.1.4. Complex formation and co-purification.....	84
<b>4.2. Crystal structure of Erb1<sub>416-807</sub> from <i>Saccharomyces cerevisiae</i>:.....</b>	<b>85</b>
4.2.1. Crystallization and crystal optimization .....	85
4.2.2. Crystallization of Nop7-Erb1 dimer yields crystals of Erb1 <sub>416-807</sub> due to sever degradation of Erb1 .....	87
4.2.3. Structural details of Erb1 <sub>416-807</sub> .....	89
4.2.4. Erb1 contains a long insertion within WD repeat 2 .....	92
4.2.5. Conserved residues form putative ligand binding areas on the surface.....	94
4.2.6. The surface of Erb1 <sub>416-807</sub> is positively charged.....	95
<b>4.3. Reconstitution of Nop7-Erb1-Ytm1 complex from <i>Chaetomium thermophilum</i> .....</b>	<b>97</b>
4.3.1. Generation of cDNA library of <i>Chaetomium thermophilum</i> .....	97
4.3.2. Expression and purification of ChErb1, ChNop7 and ChYtm1. ....	98
4.3.3. Proteins from <i>Chaetomium thermophilum</i> are more thermo-stable .....	99
4.3.4. Reconstitution of ChNop7-ChErb1-ChYtm1 complex in vitro.....	100
4.3.5. The amino-terminal domain of ChNop7 binds ChErb1 .....	102
<b>4.4. Carboxy-terminal domain of ChErb1 binds RNA in vitro.....</b>	<b>104</b>
<b>4.5. Crystal structure of ChYtm1-ChErb1Ct dimer .....</b>	<b>107</b>

4.5.1. Crystallization trials of ChErb1-ChYtm1 show that binding of ChYtm1 does not prevent degradation of ChErb1 .....	107
4.5.2. ChYtm1-ChErb1 <sub>432-801</sub> dimer crystallizes in P 2 <sub>1</sub> 2 <sub>1</sub> 2 space group in presence of ChNop7 .....	109
4.5.3. Structural details of ChYtm1 .....	110
4.5.4. $\beta$ -propeller domains of Erb1 from <i>C. thermophilum</i> and <i>S. cerevisiae</i> are highly similar .....	117
4.5.5. ChYtm1 interacts with the $\beta$ -propeller domain of ChErb1 .....	118
4.6. Functional studies corroborate the structural findings. ....	129
4.6.1. Erb1[R470E] impairs growth in yeast.....	129
4.6.2. 60S subunit biogenesis is affected in the context of Erb1[R470E] .....	130
5. DISCUSSION .....	133
5.1. Biophysical and biochemical characterization of the proteins.....	135
5.1.1. Production of Ytm1 requires eukaryotic expression system. ....	135
5.1.2. Proteins from <i>Chaetomium thermophilum</i> are more stable <i>in vitro</i> .....	136
5.1.3. Intrinsic lack of stability of Erb1 promotes crystallization of the $\beta$ -propeller domain.....	138
5.1.4. The $\beta$ -propeller domain of Erb1 binds nucleic acids. ....	139
5.1.5. Erb1 oligomerization in solution.....	140
5.2. Structural analysis of Erb1, Ytm1 and their interaction.....	141
5.2.1. The sequence and structure of the $\beta$ -propeller of Erb1 are well conserved .....	141
5.2.2. The structure of Ytm1 manifests that highly variable sequence can render perfectly conserved folds. ....	142
5.2.3. Erb1-Ytm1 dimer is maintained through a large interface between their C-terminal domains.....	146
5.2.4. Mutational analysis of ChErb1-ChYtm1 binding .....	147
5.3. Re-defining the role of the $\beta$ -propeller domain of Erb1 in <i>Saccharomyces cerevisiae</i> .....	148

<b>5.4. Summary of the interactions that hold Nop7-Erb1-Ytm1 complex together.....</b>	<b>150</b>
<b>6. CONCLUSIONS.....</b>	<b>153</b>
<b>7. REFERENCES.....</b>	<b>157</b>
<b>8. APPENDIX.....</b>	<b>169</b>
<b>8.1. Abbreviations.....</b>	<b>171</b>
<b>8.2. Publication .....</b>	<b>173</b>
