Contents

1 Introduction **1**
- 1.1 Motivation and Objectives . . . 1
- 1.2 Thesis Structure . . . 2

2 Review of Upscaling Methodologies **3**
- 2.1 Introduction . . . 3
- 2.2 The Starting Point: The Advection Dispersion Equation . . . 4
- 2.3 Time-Dependent Macrodispersive Models . . . 7
- 2.4 Multi-rate Mass Transfer Models . . . 8
- 2.5 Continuous Time Random Walk Models . . . 11
- 2.6 Fractional Advection-Dispersion Transport Models . . . 12
- 2.7 Summary . . . 13
- 2.8 References . . . 13

3 Upscaling Transport with Mass Transfer Model **17**
- 3.1 Introduction . . . 18
- 3.2 Transport Models . . . 20
  - 3.2.1 The Local Transport Model . . . 20
  - 3.2.2 The Upscaled Mass Transfer Model . . . 21
- 3.3 Monte Carlo Transport Simulations . . . 23
  - 3.3.1 Setup . . . 23
  - 3.3.2 Reference Transmissivity Fields . . . 24
  - 3.3.3 Flow and Transport Solution . . . 26
- 3.4 Estimation of Block Equivalent Properties . . . 27
  - 3.4.1 Methodology . . . 27
  - 3.4.2 Implementation Details . . . 30
- 3.5 Numerical Results and Discussion . . . 31
  - 3.5.1 Ensemble Average Behavior . . . 32
  - 3.5.2 Propagation of Uncertainty . . . 36
- 3.6 Summary and Conclusions . . . 43
- 3.7 References . . . 45

4 Modeling Solute Transport at Large Scale in Heterogeneous Media **51**
4.1 Introduction 52
4.2 Solute Transport Experiments 55
4.2.1 Experimental Design 55
4.2.2 Reference Transmissivity Field 56
4.2.3 Flow and Transport Solution 63
4.2.4 Flow and Transport Parameters 64
4.3 Results and discussion 65
4.3.1 Overview of Plume Behavior 65
4.3.2 Longitudinal Mass Distribution 69
4.3.3 Dilution Index 69
4.4 Summary and Conclusions 74
4.5 References 75

5 Conclusions and Future Research **81**
5.1 General Conclusions 81
5.2 Future Research 82

Appendix **84**

A Calibration of Mass Transfer Parameters **85**
A.1 Reference 86
