Abstract	I
Resumen	III
Resum	V
Acknowledgements	VII
Research curriculum	IX
Glossary	XIII
Introduction	1
1.1. Fuel cell types. Direct methanol fuel cells (DMFC)	3
1.2. Electro-oxidation of methanol.....	5
1.3. DMFC membranes	7
1.3.1. Composite membranes	8
1.3.2. Other advanced membranes	12
Experimental	15
2.1. Electrospinning process	17
2.1.1. Background	17
2.1.2. Fundamental aspects of electrospinning	17
2.1.3. Electrospinning parameters	20
2.1.3.1. Solution properties	20
2.1.3.2. Process variables	21
2.1.3.3. Environmental effects	21

2.2. Preparation of nanocomposite membranes	21
2.2.1. Nafion/PVA membranes	21
2.2.2. SPEEK-PVA/SPEEK-PVB membranes	26
2.3. Characterization techniques	29
Paper 1 (adapted to thesis).	
Polyvinyl alcohol nanofibre-reinforced Nafion® membranes for fuel cell applications	33
Paper 2 (adapted to thesis).	
Performance of composite Nafion/PVA membranes for direct methanol fuel cells	61
Paper 3 (adapted to thesis).	
Novel ultrathin composite membranes of Nafion/PVA for PEMFCs	89
Paper 4 (adapted to thesis).	
On the methanol permeability through pristine Nafion® and Nafion/PVA membranes measured by different techniques. A comparison of methodologies	115
Paper 5 (adapted to thesis).	
Polymer blends of SPEEK for DMFC application at intermediate temperatures	139
Paper 6 (adapted to thesis).	
Nanocomposite SPEEK-based membranes for direct methanol fuel cells at intermediate temperatures	175
Summary of results	213
3.1. Nafion/PVA membranes	215
3.1.1. Water uptake and ion-exchange capacity	215

3.1.2. Mechanical properties	216
3.1.3. Methanol permeability	216
3.1.4. Proton conductivity	217
3.1.5. DMFC performance	217
3.2. SPEEK-PVA/SPEEK-PVB membranes	218
3.2.1. Water uptake and swelling degree	218
3.2.2. Mechanical properties	219
3.2.3. Methanol permeability	219
3.2.4. Proton conductivity	220
3.2.5. DMFC performance	220
Future proposals	223
4.1. Catalytic fuel oxidation within membranes	225
4.2. High proton-conducting nanofibres	226
4.3. Increased mechanical properties of membranes	227
Conclusions	229
References	233
