

Table of Contents

CHAPTER 1 INTRODUCTION	1
1.1 ARTICULAR CARTILAGE TISSUE	2
1.1.1 Articular Cartilage Functions	4
1.1.2 Articular Cartilage Histology	5
1.1.3 Structure of Articular Cartilage.....	8
1.2 ARTICULAR CARTILAGE REGENERATION	11
1.2.1 Osteoarthritis	13
1.2.2 Repair Techniques for Articular Cartilage	14
1.2.3 Bone Marrow Stimulation Techniques.....	15
1.2.3.1 Microfracture.....	16
1.2.3.2 Drilling	16
1.2.3.3 Abrasion arthroplasty	17
1.2.3.4 Spongialisation	17
1.3 TISSUE ENGINEERING IN ARTICULAR CARTILAGE REGENERATION	18
1.3.1 Definition of Tissue Engineering (TE).....	18
1.3.2 Cell Based Repair: Autologous Chondrocyte Implantation (ACI).....	19
1.3.3 Cell Based Repair: Matrix-Induced Autologous Chondrocyte Implantation (MACI).....	20
1.3.4 Cell Source	21
1.3.4.1 Mature Chondrocytes	21
1.3.4.2 Mesenchymal Stem Cells (MSCs)	23
1.4 PHENOTYPE CHANGES IN MATURE CHONDROCYTES DURING THE DIFFERENT STAGES IN CARTILAGE ENGINEERING	25
1.4.1 Chondrocyte Expansion	25
1.4.2 TE for Chondrocytic Redifferentiation	26
1.5 SCAFFOLDS IN TISSUE ENGINEERING	27
1.5.1 Macroporous Scaffolds	27
1.5.2 Materials and their Properties	28
1.5.3 Acrylic Scaffolds.....	31
1.5.4 PCL Scaffolds	32
CHAPTER 2 OBJECTIVES	33
OBJECTIVES	34
CHAPTER 3 MATERIALS AND METHODS	35

3.1 BIOMATERIAL SYNTHESIS	36
3.1.1 Polymer and Copolymer Networks (2D).....	36
3.1.2 3D Scaffolds.....	38
3.1.2.1 Acrylic scaffolds	38
3.1.2.2 Caprolactone-based scaffolds.....	38
3.1.2.3 PCL scaffolds	40
3.2 CHARACTERISATION OF MATERIALS	42
3.2.1 Equilibrium water content (EWC)	42
3.2.2 Dynamic-mechanical analysis (DMA).....	42
3.2.3 Atomic force microscopy (AFM).....	42
3.2.4 Scanning electron microscopy (SEM).....	43
3.2.5 Contact angle measurements	43
3.2.6 Porosity of the material	44
3.3 CELLULAR AND MOLECULAR BIOLOGY	46
3.3.1 Chondrocyte isolation	46
3.3.2 Cell culture and seeding on materials.....	46
3.3.3 Pellet preparation.....	47
3.3.4 SEM.....	47
3.3.5 Histology	48
3.3.6 Immunohistochemistry	48
3.3.6.1 Immunofluorescence of the chondrocyte-cultured scaffolds.....	48
3.3.6.2 Immunohistochemistry of the chondrocyte-cultured scaffolds	49
3.3.6.3 Cell viability and proliferation assay in 2D biomaterials	49
3.3.7 RNA extraction and real-time PCR.....	49
3.3.8 Summary of biological parameters for cartilage engineering	51
3.4 STATISTICAL ANALYSIS	52
CHAPTER 4 RESULTS AND DISCUSSION	53
4.1 RESPONSE OF HUMAN CHONDROCYTES TO A NON-UNIFORM DISTRIBUTION OF HYDROPHILIC DOMAINS ON POLY (ETHYL ACRYLATE-CO-HYDROXYETHYL METHACRYLATE) COPOLYMERS	54
4.1.1 Results	54
4.1.1.1 Culture supports with modulated hydrophilicity	54
4.1.1.2 Polymer characterisation	55
4.1.1.3 Cell seeding and morphology	61
4.1.1.4 Chondrocytes proliferation and viability	64

4.1.1.5 Chondrocytes characterisation	65
4.1.2 Discussion	68
4.1.3 Conclusions	72
4.2 SCAFFOLDS WITH INTERCONNECTED SPHERICAL PORES: SPHERE TEMPLATE METHOD	73
4.2.1 Results and Discussion.....	73
4.2.1.1 Acrylic scaffolds of P(EA-co-HEMA) with controlled hydrophilicity	73
4.2.1.2 Modified-caprolactone scaffolds with varying hydrophilicity and porosity	80
4.2.1.3 Cell seeding in porogen template scaffolds.....	82
4.2.2 Conclusions	84
4.3 A POROUS PCL SCAFFOLD PROMOTES HUMAN CHONDROCYTES REDIFFERENTIATION AND HYALINE-SPECIFIC EXTRACELLULAR MATRIX PROTEIN SYNTHESIS.....	86
4.3.1 Results	86
4.3.1.1 Mature chondrocytes redifferentiation	86
4.3.1.2 Cell culture and phenotype characterisation	87
4.3.2 Discussion	90
4.3.3 Conclusions	95
4.4 IN VITRO 3D CULTURE OF HUMAN CHONDROCYTES USING MODIFIED- CAPROLACTONE SCAFFOLDS WITH VARYING HYDROPHILICITY AND POROSITY	96
4.4.1 Results and Discussion.....	96
4.4.1.1 Cell viability of chondrocytes into PCL and P(CLMA-co-HEA) scaffolds <i>in vitro</i>	96
4.4.1.2 Morphological and immunocytochemical analysis	102
4.4.2 Conclusions	106
CHAPTER 5 CONCLUSIONS	107
CONCLUSIONS.....	108
CHAPTER 6 REFERENCES	110
REFERENCES.....	111
