Abstract	xvii
Resumen	xix
Resum	xxi
1 Introduction	1
1.1 Context and Motivation	1
1.2 Objectives	5
1.3 Thesis Contributions	6
1.3.1 Priority Requests	6
1.3.2 Limiting the Storage Requirements	8
1.3.3 Switch-based Packing Technique	9
1.3.4 Multicast Data Responses	10
1.3.5 Summary	11
1.4 Thesis Outline	11
2 Concepts and Background	13
2.1 Basis of Cache Memories	13
2.1.1 Block Placement Policy	14
2.1.2 Replacement Policy	15
2.1.3 Write Policy	16
2.1.4 Structure	17
2.2 Cache Coherence	18

2.3	Coherence Models	22
2.3.1	MSI	22
2.3.2	MOSI	24
2.3.3	MESI	25
2.3.4	MOESI	26
2.3.5	Optimization for Migratory Sharing	27
2.4	Consistency Models	29
2.5	Interconnection Networks	30
2.5.1	Network Topology	30
2.5.2	Switching Techniques	32
2.5.3	Routing Techniques	33
3	Cache Coherence Mechanisms	35
3.1	Snooping-based Protocols	35
3.2	Directory-based Protocols	37
3.3	Non-traditional Protocols	40
3.4	Token-based Protocols	40
3.4.1	Token Counting	41
3.4.2	Persistent Requests	42
3.4.3	Performance Policy	45
3.5	Summary	47
4	Evaluation Methodology	49
4.1	Simulation Tools	49
4.1.1	Simics Simulator	50
4.1.2	Ruby Module	51
4.1.3	Network Simulator	51
4.1.4	Interconnection between Simulators	52
4.2	Simulated System	53
4.3	Performance Metrics	56
4.4	Workload Descriptions	58
5	The Priority Request Mechanism	63
5.1	Introduction	63
5.2	Ordered Paths	66

5.3	Priority Request Table	69
5.4	Priority Request Identifier	71
5.5	Removing Completed Priority Requests	72
5.6	Avoiding Serving Completed Priority Requests	75
5.7	Coding Identifiers in Messages	79
5.8	The Performance Policy	82
5.9	Guaranteeing Starvation-Freedom	83
5.9.1	Deadlock-Free Message Delivery	83
5.9.2	Ordering Delivery Guarantee	84
5.9.3	Priority Request Storage Guarantee	84
5.9.4	Requested Token Reception Guarantee	85
5.10	Using Several Ordered Paths	86
5.10.1	Selecting the Ordered Path	87
5.10.2	Priority Request Identifier	88
5.10.3	Storing Priority Requests	89
5.11	Discussion: Persistent Vs Priority	89
5.12	Priority Request Summary	93
5.13	Evaluation	94
5.13.1	Target System and Parameters	94
5.13.2	Starved Requests	94
5.13.3	Starvation Control	96
5.13.4	Network Traffic	97
5.13.5	Starvation Latency	98
5.13.6	Runtime	100
5.13.7	Scalability	101
5.13.8	Several Ordered Paths	103
5.14	Conclusions	105
6	Bounding Storage Requirements	107
6.1	Introduction	107
6.2	Data Structures	109
6.3	General Working Scheme	111
6.4	Ensuring the Priority Request Storage	112
6.5	Notifying the Priority Request Completion	113

6.6	Reducing the Control Traffic	116
6.6.1	Size of Rejected Priority Requests	117
6.6.2	Removing Acknowledgments	118
6.6.3	Handling Rejected Priority Requests as Transient Re- quests	119
6.7	Evaluation	120
6.7.1	Target System and Parameters	120
6.7.2	Starved Requests	121
6.7.3	Starvation Control	122
6.7.4	Network Traffic	122
6.7.5	Starvation Latency	123
6.7.6	Runtime	124
6.8	Conclusions	125
7	Switch-based Packing Technique	127
7.1	Introduction	127
7.2	Format of Priority Request Packs	130
7.3	General Packing Process	132
7.4	Checking Message Matching	133
7.5	Packing Priority Requests	134
7.6	Increasing Packing Opportunities	136
7.6.1	Increasing the Number of Ordered Paths	136
7.6.2	Allowing Different Request Types	137
7.6.3	Allowing Different Memory Addresses	138
7.7	Adjusting the Starvation Detection Timeout	141
7.8	Packing Non-Silent Invalidations	142
7.9	Evaluation	145
7.9.1	Target System and Parameters	145
7.9.2	Priority Request Endpoint Traffic	146
7.9.3	Overall Endpoint Traffic	147
7.9.4	Link Utilization	148
7.9.5	Starvation Latency	149
7.9.6	Runtime	149
7.9.7	Packing Control Responses	151

7.10	Conclusions	153
8	Multicast Responses	155
8.1	Introduction	155
8.2	MDR Packet Format	158
8.3	MDR Generation	161
8.4	Searching for MDRs at NIC Output Buffers	163
8.5	Packing Process	164
8.6	Adjusting the Starvation Detection Timeout	165
8.7	Evaluation	165
8.7.1	Target System and Parameters	166
8.7.2	Generated vs Injected Data Responses	166
8.7.3	Latency of Data Responses	167
8.7.4	Starvation Latency	168
8.7.5	Network Traffic	168
8.7.6	Runtime	169
8.8	Conclusions	170
9	Conclusions	171
9.1	Contributions	171
9.2	Conclusions	173
9.3	Scientific Publications	177
9.4	Future Work	178
	Bibliography	185
