<b>Abstract</b>	<b>9</b>
<b>Resum</b>	<b>11</b>
<b>Resumen</b>	<b>13</b>
<b>0. Motivation</b>	<b>19</b>
<b>1. Thesis Objectives and Structure</b>	<b>21</b>
<b>2. Introduction</b>	<b>25</b>
2.1 Central Nervous System	25
2.1.1 Brain	25
2.1.2 Spinal Cord	26
2.1.3 Meninges	26
2.2 Cerebrospinal Fluid	28
2.2.1 Localization	28
2.2.2 CSF Physiology: Production, Absorption and Circulation	30
2.3 Vascular System	32
2.3.1 Arterial Blood Supply to the Brain and Spinal Cord	33
2.3.2 Capillaries	35
2.3.4 Venous Blood Drainage From the Brain and Spinal Cord	36
2.4 Intracranial Dynamic	37
2.5 Noninvasive Imaging Techniques for Flow study	39
2.6 Physical Principles of Nuclear MR	41
2.6.1 Origin of the MR Signal	42
2.6.2 Nuclear Spins in a Magnetic Field	43
2.6.3 Response of the Magnetization to a Radiofrequency Pulse	44

2.6.4	Basic Characteristics of the Magnetic Resonance Signal	47
2.6.5	Longitudinal and Transversal Relaxation	48
2.6.6	Spatial Encoding of the MR Signal	51
2.6.7	The $k$ -space and the Matrix Image	55
2.7	Flow Quantification from Phase Contrast MR Imaging	55
2.7.1	Construction of the Image	56
2.7.2	Flow Sensitivity Adjustment	58
2.7.3	Cardiac Synchronization	60
2.7.4	Flow Quantification	62
2.7.5	Errors in the MR Volumetric Flow Measurements	63
<b>3.</b>	<b>Methods</b>	<b>69</b>
3.1	Segmentation Techniques	70
3.1.1	Threshold Method	73
3.1.1.1	Aqueduct of Sylvius	75
3.1.1.2	Vascular Vessels	79
3.1.2	K-means Method	81
3.2	Aliasing Correction	88
3.3	Background Correction	91
3.4	PC-MRI Acquisition Protocols	93
3.5	Quantitative Analysis	96
3.5.1	Velocity Amplitude Parameters	97
3.5.2	Flow Amplitude Parameters	97
3.5.3	Flow Temporal Parameters	97
3.5.4	Intracranial Dynamic	98
3.6	Statistical Analysis	102
3.6.1	One-Way Analysis of Variance	102
3.6.2	Bland and Altman Plot	104

3.6.3	Intraclass Correlation Coefficient	104
3.6.4	Coefficient of Variation	104
3.6.5	Percent Error	105
<b>4.</b>	<b>Results</b>	<b>107</b>
4.1	Threshold Method	107
4.1.1	Reproducibility and Comparison with other Methods	107
4.1.2	Estimation of the Background and Aliasing Correction	109
4.2	K-means Method	112
4.2.1	Reproducibility and Comparison with other Methods	112
4.2.2	Estimation of the Background and Aliasing Correction	116
4.2.3	Measurements	117
4.3	Factors that Influence on the PC Quantitative Analysis of CSF	120
4.3.1	Influence of the MR Field Strength and Circadian Rhythm	121
4.3.2	Influence of the Age and Gender	127
4.3.3	Normality Parameters	130
4.4	Clinical Applications	131
4.4.1	Aqueductal CSF Flow in White Matter Disease and NPH	131
4.4.2	Intracranial Dynamic	138
4.4.2.1	In Healthy Volunteers	138
4.4.2.1	In Neurological Disorders	143
<b>5.</b>	<b>Discussion</b>	<b>147</b>
5.1	Threshold Method	147
5.2	K-mean Method	149
5.3	Factors that Influence on the PC Quantitative Analysis of CSF	153
5.3.1	Influence of the MR Field Strength and Circadian Cycle	153
5.3.2	Influence of the Subject's Age and Gender	154
5.4	Clinical Application	155

5.4.1	Aqueductal CSF Flow in White Matter Disease and NPH	155
5.4.2	Intracranial Dynamic	158
<b>6.</b>	<b>Conclusions</b>	<b>163</b>
6.1	Reviews of Thesis Objectives	163
6.2	On the Future Work	165
	<b>Glossary</b>	<b>167</b>
	<b>References</b>	<b>169</b>
	<b>Thesis related publications</b>	<b>189</b>
	<b>APPENDIX 1</b>	<b>195</b>
