

Table of contents

Abstract	13
Resumen.....	15
Resum.....	18
Chapter 1. Introduction.....	21
1.1. Articular cartilage	23
1.1.1. Tissue organization.....	23
1.1.2. Cartilage properties.....	28
1.1.3. Articular cartilage injuries	33
1.1.4. Articular cartilage repair therapies	36
1.2. Hydrogels.....	41
1.3. Gelatin-Hyaluronic acid hydrogels	45
1.3.1. Gelatin	45
1.3.2. Hyaluronic acid.....	47
1.3.3. Extracellular-matrix inspired hydrogels of gelatin and hyaluronic acid	48
1.4. Injectable enzymatically crosslinked hydrogels of gelatin and hyaluronic acid	52
1.5. Hydrogel reinforcement.....	56
1.5.1. Hydrogels reinforced by Interpenetrating Polymer Networks	57
1.5.2. Hydrogels reinforced by combination with microfibers	59
Chapter 2. Objectives	65
Chapter 3. Injectable gelatin-fiber hydrogels.....	69
3.1. Summary	71

3.2. Interaction of two different types of PLLA fibers with gelatin. Two routes for short fiber production.	73
3.2.1. Materials and methods	73
3.2.2. Results and Discussion.....	81
3.2.3. Conclusions.....	96
3.3. Injectable Gelatin-fiber Composites with Improved Interfacial Interaction.....	98
3.3.1. Materials and Methods	98
3.3.2. Results and discussion	105
3.3.3. Conclusions.....	122
Chapter 4. ECM inspired injectable Gel-HA hydrogels.....	125
4.1. Summary	127
4.2. Injectable gelatin/hyaluronic acid hydrogels with high molecular weight HA.....	128
4.2.1. Materials and methods	128
4.2.2. Results and discussion	132
4.2.3. Conclusions.....	140
4.3. Injectable gelatin/hyaluronic acid hydrogels with low molecular weight HA. Physico-chemical characterization.	142
4.3.1. Materials and methods	142
4.3.2. Results and discussion	145
4.3.3. Conclusions.....	158
4.4. C2C12 differentiation in gelatin/hyaluronic acid injectable hydrogels.....	159
4.4.1. Materials and methods	159
4.4.2. Results and discussion	162
4.4.3. Conclusions.....	171

4.5. Chondrogenic differentiation of BM-hMSCs in gelatin/hyaluronic acid injectable hydrogels.....	173
4.5.1. Materials and Methods	173
4.5.2. Results and discussion	176
4.5.3. Conclusions.....	192
Chapter 5. Synthetic IPNs as <i>ex vivo</i> platforms for cartilage regeneration	193
5.1. Summary	195
5.2. Materials and methods	197
5.3. Results	204
5.4. Discussion	213
5.5. Conclusions.....	218
Chapter 6. Conclusions.....	221
Curriculum Vitae.....	226
Bibliography	230
Glossary.....	264
