List of figures.....	12
List of tables	18
List of abbreviations	22
Summary.....	26
Resumen	30
Resum	34
1 Motivation of the work	38
1.1 Background	38
1.2 Introduction.....	39
1.3 Aim and objectives.....	43
2 Evaluation of the nine-zone thermal head manikin	48
2.1 Introduction.....	48
2.2 Aim and objectives.....	49
2.3 Selection and characterization of the elements constituting the testing setup	50

2.3.1	The nine-zone sweating head manikin	50
2.3.2	Climatic chamber and wind tunnel.....	51
2.3.3	In-depth analysis of the precision of the heat fluxes provided by the thermal head manikin.....	52
2.3.4	Temperature calibration of the head manikin.....	59
2.3.5	Fluid calibration of the head manikin.....	61
2.4	Analysis of the performance of the nine-zone thermal head manikin for headgear testing	61
2.4.1	Introduction	61
2.4.2	Methods	62
2.4.3	Results	68
2.4.4	Discussion	74
2.5	Conclusion	78
3	Specific requirements for the head manikin under physiological control mode	80
3.1	Introduction.....	80
3.2	Aim and objectives.....	83
3.3	Definition of head parts in the coupled system	84
3.3.1	Introduction	84
3.3.2	Methods	85
3.3.3	Results	85
3.3.4	Discussion	86

3.4	Heat transfer coefficients at head parts.....	87
3.4.1	Introduction	87
3.4.2	Methods	88
3.4.3	Results	89
3.4.4	Discussion	89
3.5	Uncontrolled lateral heat exchange between head parts.....	91
3.5.1	Introduction	91
3.5.2	Methods	91
3.5.3	Results	93
3.5.4	Discussion	95
3.6	Thermal passive responsiveness of the head manikin	96
3.6.1	Introduction	96
3.6.2	Methods	96
3.6.3	Results	97
3.6.4	Discussion	99
3.7	Thermal controlled responsiveness of the head manikin.....	99
3.7.1	Introduction	99
3.7.2	Methods	100
3.7.3	Results	100
3.7.4	Discussion	101

3.8	Adjustment of the thermal controlled responsiveness of the head manikin.....	102
3.8.1	Introduction	102
3.8.2	Methods	102
3.8.3	Results	103
3.8.4	Discussion	106
3.9	Characterization of the evaporation efficiency and evaporation responsiveness of the head manikin.....	106
3.9.1	Introduction	106
3.9.2	Methods	108
3.9.3	Results	111
3.9.4	Discussion	114
3.10	Conclusions	116
4	Validation of a thermophysiological model against a dedicated database of human experiments	120
4.1	Introduction.....	120
4.2	Aim and objectives.....	125
4.3	Development of a human experiments database.....	126
4.4	Investigation of local skin temperatures during cycling in a moderate environment.	129
4.4.1	Introduction	129
4.4.2	Methods	129
4.4.3	Results	132

4.4.4	Discussion	134
4.5	Verification of temperature sensors attaching method	134
4.5.1	Introduction	134
4.5.2	Methods	135
4.5.3	Results	136
4.5.4	Discussion	137
4.6	Validation of the physiological model by Fiala for prediction of global and local skin temperatures.....	138
4.6.1	Introduction	138
4.6.2	Methods	138
4.6.3	Results	142
4.6.4	Discussion	145
4.7	Conclusion	155
5	Development and validation of the coupled system.....	158
5.1	Introduction.....	158
5.2	Aim and objectives.....	161
5.3	Coupling method.....	162
5.3.1	Coupling principle	162
5.3.2	Operation of the coupled system.....	164
5.3.3	Description of the coupling interface.....	164
5.4	Consistency of predictions for different types of boundary conditions	167

5.4.1	Introduction	167
5.4.2	Method	168
5.4.3	Results	169
5.4.4	Discussion	173
5.5	Analysis of the convergence of the coupled system towards pure simulations.....	174
5.5.1	Introduction	174
5.5.2	Methods	175
5.5.3	Results	176
5.5.4	Discussion	178
5.6	Validation against human data	183
5.6.1	Introduction	183
5.6.2	Methods	184
5.6.3	Results	186
5.6.4	Discussion	189
5.7	Conclusions	192
6	Conclusions and future work.....	196
6.1	Conclusions	196
6.2	Future work	203
7	References.....	206
8	Appendix	222

8.1 Appendix 1: Local skin temperatures upon the 14 body-sites (ISO 9886)..... 223

8.2 Appendix 2: Local skin temperatures at head-site 226
