<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Introduction .....	2
1.2	Objectives and methodology .....	5
Bibliography .....		7
<b>2</b>	<b>Diesel Combustion Strategies and Pollutant Emissions</b>	<b>9</b>
2.1	Introduction .....	11
2.2	Fuel Injection and Air/Fuel Mixture Preparation .....	11
2.2.1	Processes Induced by the Fuel Injection into the Combustion Chamber .....	11
2.2.2	Macroscopic Description of a Diesel Spray.....	12
2.3	Conventional Diffusive Combustion Process .....	15
2.3.1	Temporal and Spatial Evolution of the Conventional Diffusive Combustion .....	16
2.3.2	Formation and Destruction of Pollutant Emissions in Diffusive Combustion .....	18
2.3.2.1	Nitrous Oxides Formation .....	18
2.3.2.2	Soot Formation.....	19
2.3.2.3	Soot Oxidation .....	21
2.3.2.4	The Conventional Diffusive Combustion Dilemma	22
2.4	Premixed and Low Temperature Combustion Strategies .....	23
2.4.1	HCCI Strategy .....	24
2.4.1.1	Main Features of the Process .....	24

---

2.4.1.2	Drawbacks of HCCI Strategy .....	25
2.4.2	PCCI Strategy .....	27
2.4.2.1	Main Features of the Different PCCI Strategies	27
2.4.2.2	Limitation of the Different PCCI Strategies .	31
2.4.3	Non-Sooting Diffusive Combustion Strategies .....	32
2.4.3.1	Non-Sooting Diffusive Combustion through Extreme Combustion Temperature Reduction	32
2.4.3.2	Non-Sooting Diffusive Combustion through Extreme Oxygen Entrainment in the Lift-Off	33
2.5	Association of Conventional and Advanced Combustion Strategies.....	36
2.5.1	Early Pilot Injection Strategy .....	36
2.5.2	Post Injection Strategy .....	39
2.5.3	Reduction in the fuel Mass Injected during the Main Injection: Key Parameter of the Association of Conven- tional and Advanced Combustion Processes .....	40
2.6	Conclusions of the Literature Study and Thesis Justification .	41
	Bibliography .....	41
<b>3</b>	<b>Experimental and Modeling Tools</b>	<b>49</b>
3.1	Introduction .....	51
3.2	Single Cylinder Engine .....	51
3.2.1	Engine Characteristics .....	51
3.2.2	Variable Valve Actuation System .....	53
3.2.3	Injection System .....	55
3.3	Test Cell Description .....	56
3.3.1	Engine Air Management .....	56
3.3.1.1	Intake and Exhaust Circuits and Air Flow Measurement .....	57
3.3.1.2	EGR Circuits .....	57
3.3.1.3	Blow-by Measurement .....	59
3.3.2	Engine Auxiliary Systems .....	59

3.3.2.1	Fuel Supply Circuit and Flow Measurement .	59
3.3.2.2	Lubrication and Cooling Systems .....	60
3.3.3	Torque and Speed Measurement and Regulation Systems	60
3.3.4	Pollutant Emissions Measurement .....	61
3.3.4.1	Gas Analyzer .....	61
3.3.4.2	Smoke-Meter .....	62
3.3.5	Injection Rate Measurement .....	63
3.3.6	Data Acquisition .....	63
3.3.7	Engine Test Routine .....	65
3.4	Modeling Tools .....	66
3.4.1	Combustion Diagnosis .....	66
3.4.1.1	In-house Code CALMEC .....	66
3.4.1.2	Flame Temperature Calculation .....	67
3.4.2	1-D Spray Simulation .....	70
3.4.2.1	In-house Code DIES - Inert Spray Model ...	70
3.4.2.2	In-house Code DICOM - Reacting Spray Model	72
	Bibliography .....	73
<b>4</b>	<b>Evaluation of Two Innovative EPI Strategies</b>	<b>77</b>
4.1	Introduction .....	79
4.2	EPI Strategies with Narrow Angle Nozzle .....	80
4.2.1	Hardware Selection .....	80
4.2.1.1	Narrow-Angle Nozzle Selection .....	80
4.2.1.2	Adapted Piston.....	81
4.2.2	Hardware Influence in Conventional Combustion .....	82
4.2.2.1	Tests Definition .....	83
4.2.2.2	Combustion Process Analysis.....	83
4.2.2.3	Pollutant Emissions Results and Analysis ...	85
4.2.3	Results with EPI Strategy .....	87
4.2.3.1	Tests Definition .....	87

---

4.2.3.2	Combustion Process Analysis . . . . .	88
4.2.3.3	Pollutant Emissions Results and Analysis . . . . .	89
4.3	EPI Strategy with Injection at LP-TDC . . . . .	92
4.3.1	Injection Strategy Description and Hardware Selection	92
4.3.2	Preliminary Results . . . . .	92
4.3.3	Increased NVO Duration . . . . .	95
4.3.3.1	Tests Definition . . . . .	95
4.3.3.2	Influence of NVO duration on in-Cylinder Conditions at LP-TDC and during High Pressure Cycle . . . . .	96
4.3.3.3	Combustion Process Analysis . . . . .	97
4.3.3.4	Pollutant Emission Results and Analysis . . . . .	101
4.3.3.5	Complementary Results . . . . .	102
4.4	Conclusions . . . . .	103
4.4.1	EPI operation with narrow angle nozzle . . . . .	103
4.4.2	EPI operation at LP-TDC . . . . .	104
	Bibliography . . . . .	105
<b>5</b>	<b>Extended Parametric Study of EPI Strategy</b>	<b>107</b>
5.1	Introduction . . . . .	109
5.1.1	Adapted Hardware for EPI Strategies Introduction . . . . .	109
5.1.2	Approach for the Global Study of EPI Strategy - Definition of the Test Plan . . . . .	110
5.1.2.1	New Certification Cycles . . . . .	110
5.1.2.2	Selection of the relevant Operation Modes for the parametric Study . . . . .	111
5.1.2.3	Injection Strategies Selected . . . . .	111
5.1.2.4	Description of the Parameters Varied in the Study and their Ranges . . . . .	112
5.2	Influence of the EPI Ratio for EPI Strategies at LP-TDC and during Compression-Stroke . . . . .	115
5.2.1	Introduction . . . . .	115

5.2.2	Conditions during EPI Event and Combustion Process Analysis .....	115
5.2.2.1	In-Cylinder Conditions during EPI at LP-TDC .....	115
5.2.2.2	Mixture Homogeneity in Case of EPI during Compression-Stroke .....	116
5.2.2.3	Combustion Process Analysis.....	119
5.2.3	Emissions and Engine Efficiency .....	123
5.2.3.1	$NO_x$ Emissions .....	124
5.2.3.2	Soot emissions.....	125
5.2.3.3	$HC$ emissions .....	126
5.2.3.4	$CO$ Emissions .....	127
5.2.3.5	Fuel Consumption .....	128
5.3	Influence of commonly varied engine parameters and cross-effects with EPI strategy .....	129
5.3.1	Influence of Start of Injection Timing .....	129
5.3.2	Influence of Oxygen Concentration ( $Y_{O_2}$ ) .....	131
5.3.3	Influence of Boost Pressure .....	134
5.3.3.1	Pollutant Emission Trends varying Boost Pressure for the different Injection Strategies .....	134
5.3.3.2	Analysis of the Capability of the Boost Pressure Increase to improve the $NO_x$ -Soot Trade-Off.....	135
5.3.4	Cross-Effects of oxygen $Y_{O_2}$ and EPI Strategy at different Boost Pressure Levels .....	144
5.3.4.1	Case of the EPI at LP-TDC.....	144
5.3.4.2	Case of the EPI during Compression-Stroke ..	146
5.4	Influence of the engine operation mode with EPI strategy ..	149
5.4.1	EPI Strategy in Full-Load .....	149
5.4.2	EPI Strategy in High Engine-Speed .....	154
5.5	Impact of EPI strategy on NVH and oil-dilution.....	156
5.5.1	NVH evaluation .....	156
5.5.2	Oil-Dilution Results .....	158

5.6	Conclusions .....	159
	Bibliography .....	161
<b>6</b>	<b>Conclusions</b>	<b>163</b>
6.1	Main Conclusions of the Thesis .....	164
6.2	Perspectives and Future Works .....	166
	<b>Bibliography</b>	<b>169</b>
