Abstract	9
Summary	12
Resumen	14
Resum	16
1 Introduction	21
1.1 The Future Linear Colliders (FLCs)	22
1.2 The Compact Linear Collider (CLIC)	26
1.2.1 The CLIC two-beam acceleration scheme	26
1.2.2 Beam position monitoring requirements in the CLIC Drive Beam decelerator	29
1.3 The CLIC Test Facility 3 (CTF3)	33
2 Beam Position Monitoring in Particle Accelerators	39
2.1 Introduction	39
2.2 Fundamentals of Beam Position Monitoring	40
2.2.1 Beam-induced Electromagnetic Fields and Wall Image Current . .	40
2.2.2 Beam Position Measurement Principle	43
2.2.3 Characteristics of Beam Position Monitoring Systems	45
2.3 Types of BPM Pick-Ups (PU)	47
2.3.1 Linear-cut PUs	47
2.3.2 Button PUs	48
2.3.3 stripline PUs	50
2.3.4 Inductive PUs	53
2.3.5 Cavity BPMs	55
2.4 BPM technology selection for the CLIC Drive Beam Decelerator	56
3 Design of a stripline Pick-Up with Short-Circuited Electrodes	59
3.1 Operation principle of a stripline pick-up with short-circuited electrodes .	59
3.2 Electrical design	60
3.2.1 Electrode length	60
3.2.2 Transverse dimensions	61
3.2.3 Damping of High-Order Modes (HOMs)	65
3.2.4 Signal transmission outside the BPM body	68
3.3 Mechanical design	69

3.4	Stripline geometry issues	71
4	Design of an Electronic Acquisition System for the Stripline Pick-Up with Short-Circuited Electrodes	75
4.1	Specifications of the electronic acquisition system	75
4.1.1	Integration into the CLIC Module control and acquisition system .	75
4.1.2	Specifications given by the stripline technology.	77
4.1.3	Signal processing	81
4.2	Electronic architecture.	83
4.2.1	Selection of the ADC.	83
4.2.2	Estimated resolution.	85
4.2.3	Signal shaping and ADC driving stages.	85
4.3	Conclusions	92
5	Laboratory Characterization Tests of the Prototype Stripline BPM System	93
5.1	Low-Frequency characterization	93
5.1.1	Methodology	93
5.1.2	Test setup	95
5.1.3	Simulation of the test scenario	98
5.1.4	Results	101
5.1.5	Conclusions	105
5.2	High-Frequency characterization	105
5.2.1	Methodology	106
5.2.2	Test setup	107
5.2.3	Results	110
5.3	Conclusions	110
6	Beam Tests of the Prototype Stripline BPM System	113
6.1	Installation in TBL at CTF3	113
6.2	Linearity and sensitivity parameters	114
6.2.1	Test with 45° rotated electrodes	115
6.2.2	Test with axis-oriented electrodes	124
6.3	Resolution	134
6.4	Conclusions	136
7	Conclusions	139
