<b>ABSTRACT .....</b>	<b>9</b>
<b>RESUMEN .....</b>	<b>11</b>
<b>RESUM .....</b>	<b>13</b>
<b>LIST OF FIGURES .....</b>	<b>16</b>
<b>LIST OF TABLES .....</b>	<b>18</b>
<b>ABREVIATION LIST .....</b>	<b>19</b>
<b>GENERAL INTRODUCTION .....</b>	<b>21</b>
1. Reproductive barriers in plants. Strategies to avoid inbreeding .....	23
2. Historical evolution of the self-incompatibility concept .....	24
3. Genetics of self-incompatibility. Gametophytic and sporophytic systems. ....	25
4. Self-incompatibility as an agronomic relevant trait .....	27
4.1. S-genotyping facilitates pollination control.....	28
4.2. SI as an alternative to androsterility for developing hybrids.....	28
4.3. Removing interspersed pollinators while increasing fruit set and quality.....	30
5. Molecular mechanisms underlying self-incompatibility .....	31
6. Gametophytic Self-Incompatibility based on S-RNases .....	34
6.1. Female ( <i>S</i> -RNases) and male ( <i>S</i> -locus F-box proteins) <i>S</i> -determinants.....	34
6.2. <i>S</i> -locus unlinked genes controlling GSI: the modifier factors.....	35
6.3. Biochemical models proposed for the S-RNase-based GSI system .....	37
7. S-RNase based GSI in <i>Prunus</i> . Is it a different mechanism? .....	39
7.1. <i>S</i> -pollen and <i>S</i> -pistil determinants in <i>Prunus</i> .....	39
7.2. Modifier factors identified in <i>Prunus</i> .....	42
7.3. Biochemical model proposed for <i>Prunus</i> GSI.....	43
8. The self-compatible apricot cultivar ‘Canino’. A case of study.....	44
8.1. Genetic and molecular analysis .....	44
8.2. Mapping of the <i>S</i> -locus unlinked pollen-part mutation conferring SC .....	45
<b>MAIN OBJECTIVES.....</b>	<b>47</b>
<b>Chapter 1:</b> An <i>S</i> -locus independent pollen factor confers Self-Compatibility in ‘Katy’ apricot.....	49
<b>Chapter 2:</b> Pollen-part mutated <i>m</i> -haplotype is associated with self-compatibility and widely distributed in apricot germplasm .....	77
<b>Chapter 3:</b> The <i>Prunus armeniaca</i> <i>M</i> -locus <u>Disulfide bond A-like Oxidoreductase</u> ( <i>PaMDOr</i> ) gene is an essential pollen factor for self-incompatibility .....	103
<b>Chapter 4:</b> Comparative study of the GSI system in Rosaceae and Solanaceae by analyzing orthology relationships for modifier factors .....	139
<b>GENERAL DISCUSSION .....</b>	<b>173</b>
<b>CONCLUSIONS .....</b>	<b>181</b>
<b>REFERENCES .....</b>	<b>183</b>
<b>SUPPLEMENTAL INFORMATION .....</b>	<b>199</b>
Supporting information chapter 1 .....	200
Supporting information chapter 2 .....	214
Supporting information chapter 3 .....	218
Supporting information chapter 4 .....	233
