<b>Abstract</b> .....	<b>i</b>
<b>Resumen</b> .....	<b>iii</b>
<b>Resum</b> .....	<b>v</b>
<b>List of figures</b> .....	<b>xi</b>
<b>List of tables</b> .....	<b>xv</b>
<b>Nomenclature</b> .....	<b>xvii</b>
<b>1. Introduction</b> .....	<b>1</b>
1.1 Motivation .....	1
1.2 Overview of magnetic refrigeration at room temperature.....	2
1.2.1 Working principle.....	2
1.2.2 Magnetocaloric materials.....	5
1.2.3 Magnetic refrigerator prototypes.....	8
1.2.4 Practical applications.....	12
1.3 Mobile air-conditioning systems .....	12
1.4 Objectives and structure of the work.....	15
<b>2. The active magnetic regenerator model</b> .....	<b>17</b>
2.1 Literature review of AMR models .....	17
2.2 Governing equations .....	21
2.2.1 Fluid equation.....	23
2.2.2 Regenerator equation .....	26
2.2.3 Numerical solution algorithm.....	27
2.2.4 Calculation of performance indicators .....	27
2.3 Validation and comparison with the implicit scheme.....	28
2.3.1 Transport equation.....	28
2.3.2 Single-blow ideal passive regenerator.....	30
2.3.3 Oscillating ideal passive regenerator.....	32
2.3.4 Oscillating passive regenerator.....	33
2.4 Magnetocaloric material properties .....	35

2.5	Demagnetizing effect: calculation of the internal magnetic field.....	40
2.6	Conjugate heat transfer .....	41
2.6.1	Effect of fluid flow maldistribution .....	44
2.6.2	Effect of transversal conduction in the plates .....	45
2.7	Pressure drop.....	45
<b>3.</b>	<b>Experimental validation of the passive regenerator model.....</b>	<b>47</b>
3.1	Single-blow experimental setup .....	47
3.2	Single-blow experimental results.....	50
3.3	Single-blow modelling .....	51
3.4	Single-blow simulation results and model validation.....	52
3.4.1	Initial simulation results of the complete stack.....	52
3.4.2	Influence of 2D heat conduction in the plates.....	54
3.4.3	Influence of thermal inertia .....	54
3.4.4	Validation of the $Nu$ correlation.....	58
3.5	Single-channel model approach.....	61
<b>4.</b>	<b>Experimental validation of the AMR model.....</b>	<b>63</b>
4.1	AMRR experimental setup.....	63
4.1.1	Description of the experimental apparatus .....	63
4.1.2	Description of the AMR experiments .....	65
4.2	AMRR simulations setup .....	68
4.2.1	Calculation of the inlet temperatures to the AMR model.....	68
4.2.2	Estimation of the thermal losses to the ambient.....	70
4.2.3	Time and space grids.....	71
4.3	Validation results and discussion.....	71
4.3.1	Uncertainties in the magnetocaloric properties .....	74
4.3.2	Computation of the demagnetization .....	74
4.3.3	Conjugate heat transfer correlations and fluid flow maldistribution.....	78
4.3.4	Variation of the inlet temperatures due to the losses to the ambient ...	80
4.3.5	Uncertainty in the lag time.....	82
<b>5.</b>	<b>The mobile air-conditioning system model.....</b>	<b>83</b>
5.1	Description of the modelled system.....	83
5.2	The global MAC system model .....	84

5.3	The cabin model.....	86
5.3.1	Literature review.....	86
5.3.2	Governing equations.....	87
5.3.3	Validation.....	92
5.4	The thermal power distribution loop model.....	98
5.4.1	The piping model.....	99
5.4.2	The electrical auxiliaries model.....	100
5.5	The heat exchanger model.....	101
5.5.1	Literature review.....	101
5.5.2	Governing equations.....	102
5.5.3	Validation.....	106
5.6	The reversible refrigerator model interface.....	111
<b>6.</b>	<b>Design of an AMRR for a mobile air-conditioning system.....</b>	<b>113</b>
6.1	Literature review on AMRR parametric studies.....	113
6.2	Mobile air-conditioning requirements.....	115
6.2.1	Thermal load.....	115
6.2.2	Working temperatures.....	117
6.2.3	Mass.....	118
6.2.4	Efficiency.....	118
6.3	AMRR definition.....	119
6.3.1	Calculation of the AMRR performance.....	120
6.3.2	Calculation of the AMRR mass.....	121
6.4	AMRR simulation setup.....	122
6.4.1	Methodology.....	122
6.4.2	Parameter space.....	123
6.5	Cooling performance.....	124
6.5.1	Selection of MCMs.....	124
6.5.2	Case S1: 3027 W at 29.4 K span.....	127
6.5.3	Case S2: 2803 W at 34.8 K span.....	132
6.5.4	Comparison of summer design points.....	134
6.6	Heating performance.....	135
<b>7.</b>	<b>Conclusions.....</b>	<b>139</b>

7.1 On the AMR model.....	139
7.2 On the MAC system model.....	141
7.3 On the application of AMRRs in MAC systems.....	142
7.4 Future work .....	143
