

Index

Chapter 1. Introduction

1.1 Motivation and scope.....	1-4
1.2 Background information.....	1-9
1.2.1 Acoustoelastic techniques.....	1-10
1.2.2 Higher harmonic generation.....	1-13
1.2.3 Nonlinear resonant techniques.....	1-18
1.2.4 Pump and probe wave interaction based techniques.....	1-24
References.....	1-31

Chapter 2. Materials and methods

2.1 Materials.....	2-4
2.2 Inspection techniques.....	2-5
2.2.1 Standard methods.....	2-5
2.2.2 Nonlinear Impact Resonance Acoustic Spectroscopy.....	2-6
2.2.3 Other inspection techniques.....	2-11
References.....	2-11

Chapter 3. Effect of drying and internal moisture content (I)

3.1 Introduction.....	3-4
3.2 Experimental details.....	3-6
3.3 Results.....	3-7
3.4 Conclusions.....	3-14
References.....	3-14

Chapter 4. Effect of drying and internal moisture content (II)

4.1 Introduction.....	4-4
4.2 Experimental details.....	4-6
4.3 Results.....	4-10
4.4 Discussion and conclusions.....	4-18
References.....	4-21

Chapter 5. Mechanical damage

5.1. Experimental details.....	5-4
5.2. Results and discussion.....	5-5
5.2.1. Standard resonant frequency method.....	5-5
5.2.2. Nonlinear Impact Resonant Acoustic Spectroscopy.....	5-12
5.2.3. Discussion.....	5-18
5.3. Summary and conclusions.....	5-24
References.....	5-26

Chapter 6. Freezing-thawing damage

6.1. Introduction.....	6-3
6.2. Experimental details.....	6-5
6.3. Results and discussion.....	6-6
6.4. Conclusions.....	6-19
References.....	6-19

Chapter 7. Reinforced cement composites: case of glass reinforced concrete (GRC)

7.1. Introduction.....	7-4
7.2. Background information.....	7-7
7.3. Experimental investigation.....	7-10

7.3.1. Specimen fabrication	7-10
7.3.2. Nonlinear Impact Resonance Acoustic Spectroscopy	7-11
7.4. Results and discussion	7-15
7.4.1. Nonlinear Impact Resonance Acoustic Spectroscopy	7-15
7.5. Conclusions	7-26
References	7-27

Chapter 8 Nonlinear Single Impact Resonance Acoustic Spectroscopy (NSIRAS): Frequency domain analysis

8.1. Introduction	8-3
8.1.1. Effect of window type and window length	8-5
8.2. Assessment of freezing-thawing damage	8-9
8.2.1. Experimental details	8-9
8.2.2. Results	8-10
8.3. Summary and conclusions	8-20
8.4. References	8-21

Chapter 9. Nonlinear Single Impact Resonance Spectroscopy (NSIRAS). Time domain analysis

9.1. Introduction	9-4
9.2. Signal processing in the time domain	9-5
9.3. Experimental details	9-8
9.3.1. Materials	9-8
9.3.2. Damage protocol	9-9
9.3.3. Inspection techniques and signal processing	9-10
9.4. Algorithm	9-11
9.5. Comparison between NIRAS and NSIRAS approaches	9-21
9.6. Summary and conclusions	9-27

References.....	9-28
Chapter 10. Assessment of carbonation of Portland cement mortar	
10.1. Background on carbonation.....	10-4
10.2. Experimental details.....	10-7
10.3. Results.....	10-8
10.4. Conclusions.....	10-15
References.....	10-16
Chapter 11. Dynamic acousto-elastic test using continuous probe wave and hammer blow	
11.1. Introduction.....	11-4
11.2. Experimental details.....	11-8
11.2.1. Materials.....	11-8
11.2.2. Experimental configuration.....	11-9
11.2.3. Signal processing.....	11-11
11.2.4. Estimation of strain from acceleration response.....	11-14
11.3. Results and discussion.....	11-16
11.4. Conclusions.....	11-24
References.....	11-25
Chapter 12. Further discussion, conclusions, disparate tests and future work
