

## General index

Acknowledgements.....	i
Abstract.....	iii
Resumen.....	v
Resum.....	vii
General index.....	ix
Index of figures.....	xiii
Index of tables.....	xv
List of abbreviations.....	xvii
Chapter 1: <b>Introduction</b> .....	1
1.1 Water resources management in water scarce regions.....	3
1.2 Moving towards Integrated Water Resources Management.....	4
1.3 Methodologies to support IWRM.....	7
1.3.1 European Policies.....	7
1.3.2 Review of hydro-economic models.....	9
1.3.3 Summary of methodologies.....	10
1.4 Motivation, scope and objectives of the research.....	11
1.5 Related publications.....	13
1.6 Structure of the Thesis.....	14
Chapter 2: <b>State of the Art</b> .....	17
2.1 Water Accounting.....	19
2.1.1 Literature review.....	19
2.1.1.1 Economic water accounting.....	19
2.1.1.2 Physical water accounting.....	22
2.1.2 Critical assessment.....	27
2.2 Freshwater Ecosystem Services.....	30
2.2.1 Literature review.....	30
2.2.1.1 Ecosystem Services frameworks.....	31
2.2.1.2 Models for ecosystem services assessment.....	34
2.2.2 Critical assessment.....	37
Chapter 3: <b>Methods</b> .....	43
3.1 The Australian Water Accounting Standard.....	45

3.1.1	Original version.....	45
3.1.2	Improved version .....	49
3.2	Integrated Water Resources Management Tools for Ecosystem Services assessment.....	52
3.2.1	Freshwater provisioning service .....	55
3.2.2	Water purification service .....	60
3.2.3	Aquatic habitat service.....	64
3.2.4	Interactions among FES .....	67
Chapter 4:	<b>Application of methodologies</b> .....	69
4.1	The Australian Water Accounting in the Júcar River Basin .....	71
4.1.1	Case study description .....	71
4.1.2	Results.....	73
4.1.2.1	Data and scope.....	73
4.1.2.2	Water accounts.....	76
4.1.3	Discussion .....	83
4.2	The Freshwater Production Service in the Tormes River Basin.....	85
4.2.1	Case study description .....	85
4.2.2	Results.....	87
4.2.2.1	Data and scope.....	87
4.2.2.2	Scenario 1: Business as usual.....	88
4.2.2.3	Scenario 2: Land use change.....	90
4.2.2.4	Scenario 3: Water management change .....	92
4.2.3	Discussion .....	94
4.3	The Water Purification Service in the Llobregat River Basin .....	95
4.3.1	Case study description .....	95
4.3.2	Results.....	97
4.3.2.1	Data and scope.....	97
4.3.2.2	Scenario 1: Business as usual.....	99
4.3.2.3	Scenario 2: Implementation of measure M12.1 .....	104
4.3.3	Discussion .....	106
4.4	The Aquatic Habitat Service in the Turia River Basin .....	107
4.4.1	Case study description .....	107
4.4.2	Results.....	109

4.4.2.1	Data and scope .....	109
4.4.2.2	Scenario 1: Business as usual .....	112
4.4.2.3	Scenario 2: Fishing oriented management .....	114
4.4.3	Discussion.....	117
Chapter 5:	<b>General discussion</b> .....	121
5.1	Key findings and recommendations .....	123
5.2	Limitations .....	127
Chapter 6:	<b>Conclusions</b> .....	129
5.3	Summary .....	131
5.4	General conclusions .....	132
5.5	Future research .....	135
	<b>References</b> .....	137
	<b>Annexes</b> .....	165
A1.	Adapting water accounting for integrated water resource management. The Júcar Water Resource System (Spain) .....	167
A.2	Using ecosystem services to represent the environment in hydro-economic models.....	199
A.3	Integrating ecosystem services in river basin management plans.....	236
A.4	License agreement for Momblanch et al. 2014 .....	262
A.5	License agreement for Momblanch et al. 2016 .....	268
A.6	License agreement for Terrado et al. 2016 .....	274
A.7	Detailed water accounts for the Júcar River Basin in the hydrological year 2007/2008 in its original and improved versions. ....	278
