

TABLE OF CONTENTS

ABSTRACT	17
1. INTRODUCTION	25
1.1. Current situation of food packaging	25
1.2. Biodegradable polymers for food packaging	27
1.3. Strategies for improving properties of starch films used in the present study	38
1.3.1. Starch oxidation	38
1.3.2. Starch-protein blend films	40
1.4. Active biodegradable films for food packaging	43
1.4.1. Use of lactoferrin, lysozyme and ethyl lauroyl arginate (LAE) as antimicrobial compounds	49
2. OBJECTIVES	76
3. CHAPTERS	78
CHAPTER 1 Physical and bioactive properties of corn starch - buttermilk edible films	80
CHAPTER 2 Effect of the incorporation of antimicrobial/antioxidant proteins on the properties of potato starch films	112
CHAPTER 3 Influence of the processing method and antimicrobial agents on properties of starch-gelatin biodegradable films	147
CHAPTER 4 Influence of starch oxidation on the functionality of starch-gelatin based active films	176
CHAPTER 5 Active starch-gelatin films for shelf-life extension of marinated salmon	210
Starch-gelatin antimicrobial packaging materials to extend the shelf life of chicken breast fillets	236
4. GENERAL DISCUSSION	264
5. CONCLUSION	273
