

ABSTRACT	I
RESUMEN	III
RESUM	V
INDEX	1
INTRODUCTION	7
Plants and environment	9
Abscisic acid	11
ABA synthesis and catabolism	11
ABA transport.....	13
ABA roles in plants.....	14
Germination and dormancy	15
Stomatal dynamics.....	16
Root development.....	17
Control of flowering time	18
Biotic stress.....	18
ABA-mediated gene regulation	19
Core signaling pathway	20
ABA receptors	23
PYR/PYL/RCAR ABA receptors in <i>Solanum lycopersicum</i>	27
Protein Phosphatases type 2C, PP2Cs	30
PP2CA/AHG3	34
SNF1-related protein kinases2, SnRK2s	37
Transcription factors in ABA signaling	42
Chromatin remodeling and ABA signaling	47
SWI/SNF Chromatin Remodeling Complexes (CRC)	49
BRM, the core ATPase of SWI/SNF CRC.....	53
Structure of BRM protein	53
BRM mutants	55
BRM as a growth and development regulator	57

Pluripotency and differentiation	57
Developmental phase transitions	58
Stress response and growth	59
Beyond transcription	59
OBJECTIVES	61
RESULTS	64
Chapter One: A direct link between the core ABA signaling pathway and the chromatin remodeling ATPase BRAHMA	65
CHARACTERIZATION OF <i>brm-3</i> MUTANT	67
INTERACTIONS BETWEEN BRM AND CORE ABA SIGNALING PATHWAY ELEMENTS	68
Genetic Interaction between SnRK2.2/2.3 and BRM	68
Physical interaction of BRM with SnRK2s and clade A PP2Cs	72
CORE ABA SIGNALING COMPONENTS MEDIATE PHOSPHORYLATION/DEPHOSPHORYLATION OF BRM	80
<i>In vitro</i> phosphorylation/dephosphorylation of the carboxy-terminal region of BRM by OST1/PP2CA	80
Identification of BRM phosphorylated sites by OST1	84
INTERPLAY AMONG ABA CORE ELEMENTS AND BRM	89
PYR/PYL ABA receptors impair the interaction of PP2CA with BRM	89
BRM ^{S1760D S1762D} phosphomimetics display ABA hypersensitivity and increased <i>ABI5</i> expression	91
Chapter Two: The ABA signalosome interact with BRAHMA to regulate expression of ABI4 and early seedling establishment	97

BRM IS GENETICALLY AND PHYSICALLY RELATED WITH ABI4.....	99
Genetic Interaction between ABI4 and BRM	99
BRM regulates ABI4 through direct interaction with the <i>ABI4</i> promoter	102
BRM also interacts with PYR/PYL/RCAR ABA receptors	105
Chapter Three: Characterization and biotechnological use of PP2CA promoter in <i>A. thaliana</i>.....	111
PP2CA PROMOTER CHARACTERIZATION	113
Expression pattern of PP2CA promoter	113
PP2CA PROTEIN DYNAMICS	118
ProPP2CA drives the expression of PP2CA in <i>pp2ca-1 A. thaliana</i> mutant	118
PP2CA degradation is induced by ABA.....	121
ProPP2CA AS AN INDUCIBLE PROMOTER FOR PROTEIN EXPRESSION	126
ProPP2CA drives stress-inducible expression of <i>Arabidopsis thaliana</i> and <i>Solanum lycopersicum</i> ABA receptors	126
Expression of <i>abi1-1</i> driven by ProPP2CA leads to ABA-insensitivity in root.....	133
DISCUSSION	139
CONCLUSIONS	147
MATERIALS AND METHODS	151
Biological Materials	153
Bacterial Strains	153
Yeast strains	153
Plant Material.....	153

Growing Conditions and Transformation	154
Bacterial Culture.....	154
Transformation	155
Yeast Culture	156
Yeast Co-Transformation	157
<i>Arabidopsis thaliana</i>	157
<i>In Vitro</i> Tissue Culture.....	157
Plant Treatments.....	158
Greenhouse Culture	159
Generation of Mutants.....	159
<i>Arabidopsis thaliana</i> Transgenic Lines Generation.....	160
Physiological Assays	161
Seed Germination and Seedling Establishment Assays	161
Root Growth Assays.....	161
Drought Stress Assays.....	162
Nucleic Acids Extraction and Analysis Methods	162
DNA Extraction	162
<i>Escherichia coli</i>	162
<i>Arabidopsis thaliana</i>	163
DNA Analysis by PCR Reaction	164
Generation of Entry Vectors	167
GATEWAY™ Cloning	167
Generation of Destiny Vectors.....	167
GATEWAY™ LR Clonase II Reaction	167
Constructions for Yeast-Two and -Three Hybrid	167
Constructions for In Planta Expression.....	169
Constructions for Bi-molecular Fluorescence Complementation (BiFC) and multicolor BiFC (mcBiFC) in <i>Nicotiana benthamiana</i>	170
Constructions for Protein Purification in <i>Escherichia coli</i> ...	171

Constructions for Transgenic Lines Generation	172
Phosphomimetics and Phosphomutants Generation.....	173
RNA extraction and PCR analysis of gene expression	
.....	174
Analysis of <i>ABI5</i> Expression	174
Analysis of <i>ABI4</i> Expression	175
Analysis of <i>ABI4</i> Promoter.....	176
Protein Technology	177
Recombinant Protein Induction In <i>Escherichia coli</i>	177
Recombinant Protein Purification in <i>Escherichia coli</i>	
.....	177
His-tag proteins culture and purification	177
MBP-tag proteins culture and purification	178
Coomassie staining	179
Protein Extraction.....	179
<i>Saccharomyces cerevisiae</i>	179
<i>Nicotiana benthamiana</i>	180
<i>Arabidopsis thaliana</i>	180
Biochemical Fractionation	181
SDS-PAGE Electrophoresis	182
Western Blot Analyses	182
<i>In vitro</i> phosphorylation and phosphopeptide proteomic	
analysis.....	184
Yeast Two-Hybrid and Triple-Hybrid Assays	186
<i>β</i>-Glucuronidase Staining.....	187
GUS Histochemical assay	187
GUS Fluorogenic assay	189
Pseudo-Schiff-Propidium Iodide Root Staining.....	189

Agro-transformation, Transient Expression and Bi-molecular Fluorescence Complementation Assays ..	190
<i>Arabidopsis thaliana</i> Protoplast Generation and Transient Expression Assays.....	191
Confocal Laser Scanning Microscopy	192
Chromatin Immunoprecipitation (ChIP)	192
REFERENCES	195
ABBREVIATIONS	223
APPENDIX: Publications generated from this thesis ...	231
