Introduction, Summary and Notation	1
0.1 Introduction	1
0.2 Notation	2
0.3 Summary	3
0.4 A matter of contrast	9
1 Gul’ko compacta	11
2 WCG Banach spaces and their relatives	21
2.1 Some tools	21
2.2 Examples	31
2.2.1 WCG Banach spaces	31
2.2.2 WCD Banach spaces	33
2.2.3 WLD Banach spaces	35
2.3 Biorthogonal systems in WCG Banach spaces	40
3 A renorming result	49
4 Some remarks on Krein’s theorem	53
4.1 Upper envelopes and distances	53
4.2 Quantitative Krein’s Theorem	56
4.2.1 Interchanging limits and ε -WSK sets	56
4.2.2 ε -WSK sets in natural settings	61
5 Flat sets, ℓ_p-generating and fixing c_0 in nonseparable setting	63
5.1 Introduction	63
5.2 Asymptotically p -flat and p -flat sets	65
5.2.1 Asymptotically p -flat sets	65
5.2.1.1 Basic results and some remarks	65
5.2.1.2 Some stability properties	76
5.2.1.3 Canonical examples	78
5.2.2 Innerly asymptotically p -flat sets	80

5.2.2.1	Definitions	80
5.2.2.2	Remarks and examples	80
5.2.2.3	Stability results	82
5.3	Generating a space through an operator	83
5.3.1	Introduction	83
5.3.1.1	Remarks and examples	83
5.3.2	The results	85
5.3.2.1	The Asplund setting	85
5.3.2.2	The general setting	85
5.3.3	Proofs	87
5.4	Some remarks on long Schauder bases	94
5.5	Fixing $c_0(\Gamma)$ by operators	99
5.5.1	Introduction and results	99
5.5.2	Proofs	100
6	Appendix	107
6.1	Appendix A	107
6.2	Appendix B	109
6.3	Problems	110
	References	111
