Declaration.....	i
Acknowledgements.....	iii
Resum	vii
Resumen.....	ix
Abbreviations.....	xi
Summary PVA-based proton exchange membranes.....	xiii
List of Figures.....	xix
List of Schemes.....	xxvii
List of Tables	xxix

Chapter 1. Motivation and Overview

1.1. Motivation.....	3
1.2. Aim of the thesis	5
1.3. Outline of the thesis	6

Chapter 2. Introduction

2.1. Fundamentals of Fuel Cells (FCs).....	13
2.2. Classification of Fuel Cells	15
2.3. Direct methanol fuel cells (DMFCs).....	20
2.4. Proton Exchange Membrane (PEM)	22
2.4.1. Proton Exchange Membranes for DMFCs.....	24
2.5. Poly(vinyl alcohol) (PVA)	27
2.5.1. PVA-based composite membranes with graphene oxide (GO).....	30

Chapter 3. Experimental part

3.1. Synthesis of starting materials	41
--	----

3.1.1.	Chemicals	42
3.1.2.	Synthesis of sulfonated poly(vinyl alcohol) (sPVA)	42
3.1.3.	Synthesis of graphene oxide (GO).....	43
3.1.4.	Synthesis of sulfonated graphene oxide (sGO)	44
3.2.	Preparation of free-standing GO membranes.....	45
3.3.	Preparation of hybrid organic-inorganic composite membranes	47
3.3.1.	Solution-casting method.....	47
3.3.2.	Layer-by-Layer (LbL) assembly method	48
3.4.	Characterization techniques	52

Chapter 4. Solution-cast proton exchange composite membranes

4.1.	Summary	87
4.2.	Contribution I:.....	89
Bi-sulfonation of poly(vinyl alcohol)/Graphene oxide composite membranes for Proton Exchange Membrane Fuel Cell applications. Part 1: Membrane preparation and characterization		
4.3.	Contribution II:.....	125
Bi-sulfonation of poly(vinyl alcohol)/Graphene oxide composite membranes for Proton Exchange Membrane Fuel Cell applications. Part 2: Functional membrane properties		
4.4.	Contribution III:	147
Layer-by-Layer assembly of poly(vinyl alcohol)/graphene oxide hybrid composite membranes via hydrogen-bonding interactions for direct methanol fuel cells 195		

Chapter 5. Layer-by-Layer assembled proton exchange composite membranes

5.1.	Summary	197
5.2.	Contribution IV:	199
Layer-by-Layer assembly of poly(vinyl alcohol)/graphene oxide hybrid composite membranes via hydrogen-bonding interactions for direct methanol fuel cells		

5.3. Contribution V:	237
----------------------------	-----

Layer-by-Layer assembly of poly(vinyl alcohol)/graphene oxide hybrid composite membranes via electrostatic interactions for direct methanol fuel cells

Chapter 6. Conclusions and further work

6.1. Conclusions.....	277
6.2. Further work.....	282
