

# THIN FILM SOLAR CELLS BASED ON COPPER-INDIUM-GALIUM SELENIDE (CIGS) MATERIALS DEPOSITED BY ELECTROCHEMICAL TECHNIQUES

## Table of Contents

List of abbreviations and symbols .....	5
List of figures. ....	7
List of tables .....	11
Acknowledgements .....	13
Dedication .....	15
Abstract .....	17
Resumen (Castellano) .....	21
Resum (Valencià) .....	23
<b>Chapter 1 Introduction</b>	
1.1 Energy .....	27
1.1.1 Solar energy .....	27
1.2 Photovoltaics .....	28
1.2.1 Different Generations of (Photovoltaic) Solar Cell Technology .....	29
1.2.1.1 First PV Generation .....	29
1.2.1.2 Second PV Generation .....	30
1.2.1.3 Third Generation PV Full Spectrum Utilization .....	31
1.3 Advantages of Photovoltaic thin films Technology .....	31
1.4 Thin-film Solar Cells technology .....	32
1.5 Cu(In,Ga)Se <sub>2</sub> thin-film solar cells. ....	33
1.6 physics of solar cells .....	34
1.6.1 Fabrication of Cu(In,Ga)Se <sub>2</sub> thin-film solar cells.....	35
1.6.2 Energy band diagram of Cu(In,Ga)Se <sub>2</sub> thin-film solar cells.....	36
1.7 Electronic properties of materials .....	38
1.8 Direct and indirect bandgap semiconductors .....	40
1.9 Thesis objective and organization .....	41
<b>Chapter 2 Experimental, Techniques and Characterization</b>	
2.1 Electrodeposition .....	45

2.2 Chemical Bath Deposition (CBD).....	46
2.3 Annealing and Sulfurization process .....	47
2.4 UV- Visible Spectroscopy.....	48
2.5 X-ray Diffraction analysis (XRD) .....	49
2.6 Field -emission Scanning Electron Microscopy analysis (FESEM).....	50
2.7 Energy-dispersive Spectroscopy analysis (EDS).....	51
2.8 Atomic Force Microscopy (AFM).....	52
2.9 Transmission electron microscopy (TEM) analysis.....	53
2.10 Photo electrochemical analysis.....	55
2.11 Current-Voltage (JV) Measurements.....	56
2.12 External quantum efficiency measurement.....	58
<b>Chapter 3 Synthesis and characterization of Cu(In,Ga)(Se,S)<sub>2</sub> thin films</b>	
3.1 introduction .....	61
3.2 Substrate cleaning .....	62
3.3 preparation of Cu(In,Ga)(Se,S) <sub>2</sub> thin films .....	63
3.3.1 Cyclic voltammetry of the Cu(In,Ga)(Se,S) <sub>2</sub> thin films .....	64
3.3.2 Electrodeposition of the Cu(In,Ga)(Se,S) <sub>2</sub> thin films .....	65
3.4 Post deposition heat treatments .....	65
3.5 Engineering of Bandgap by Ga addition and sulfurization.....	66
3.5.1 Sulfurization process of CuGaSe <sub>2</sub> thin films .....	67
3.5.2 Chromium doped with CuGaS <sub>2</sub> thin films.....	67
3.6 Characterization techniques Cu(In,Ga)(Se,S) <sub>2</sub> thin films.....	68
3.6.1 X-Ray diffraction (XRD) analysis .....	68
3.6.2 Scanning Electron Microscopy (SEM) analysis .....	70
3.6.3 Energy Dispersive Microscopy (EDS) analysis .....	71
3.6.4 Atomic Force Microscopy (AFM) analysis .....	74
3.7 Optical analysis of Cu(In,Ga)(Se,S) <sub>2</sub> thin films .....	75
3.7.1 Absorption.. .....	75
3.7.2 Transmittance .....	75
3.7.3 Energy bandgap of CuGaSe <sub>2</sub> , CuGaS <sub>2</sub> thin films .....	76
Conclusion .....	78

## **Chapter 4 Buffer layer Synthesis and characterization of CdS and CdZnS thin films**

4.1 Introduction of Cadmium sulfide (CdS) and Cadmium zinc sulfide (CdZnS) thin films .....	81
4.1.1 Cadmium sulfide (CdS) .....	81
4.1.2 Cadmium Zinc Sulfide (CdZnS) .....	82
4.1.3 Mechanism of $Cd_{1-x}Zn_xS$ thin films formation.....	83
4.2 Preparation of $Cd_{1-x}Zn_xS$ thin films .....	84
4.2.1 Chemical bath deposition (CBD) process .....	86
4.2.2 X-ray diffractograms characterization .....	86
4.2.3 Scanning electron microscopy characterization.....	87
4.2.4 Atomic Force Microscopy characterization .....	88
4.2.5 Transmission Electron Microscopy (TEM) Analysis .....	90
4.2.6 Optical characterization .....	92
4.2.7 Photo electrochemical analysis (PEC) .....	94
Conclusion .....	95

## **Chapter 5 Simulation studies of CuGaSe<sub>2</sub>, CuGaS<sub>2</sub> doped by different Cr at%**

5.1 Introduction .....	97
5.2 Preparation of CuGaSe <sub>2</sub> , CuGaS <sub>2</sub> thin films .....	98
5.2.1 X-ray diffractograms characterization .....	99
5.2.2 Energy dispersive spectroscopy characterization .....	101
5.2.3 Optical analysis of the CuGaSe <sub>2</sub> , CuGaS <sub>2</sub> and CuGaS <sub>2</sub> :Cr thin films .....	102
5.3 Intermediate band concept and model.....	103
5.4 Numerical simulation of solar cells based on CuGaS <sub>2</sub> :Cr absorbers .....	105
5.4.1 Energy band diagram of Mo/CuGaS <sub>2</sub> /CdS/ZnO thin films solar cell .....	106
5.4.2 External Quantum Efficiency (EQE) of CuGaS <sub>2</sub> :Cr solar cell .....	107
5.4.3 Current and Voltage characteristics of CuGaS <sub>2</sub> :Cr thin film solar cells.....	108
5.4.4 Current and Voltage characteristics of CuGaS <sub>2</sub> :Cr thin film solar cell with different neutral defects .....	109
Conclusion.....	111
<b>Chapter 6 Conclusions and future work outlook .....</b>	<b>113</b>

Summarizes the work presented here and the overall, additionally possible future guidelines in applying the research capabilities and building from the significant results described in this dissertation.
