| <b>Abstract</b>   | iii   |
| <b>Resumen</b>  | v     |
| <b>Resum</b>  | vii   |
| <b>Acknowledgements</b>                                 | ix    |
| <b>List of symbols</b>                                  | xxi   |
| <b>Abbreviations and Acronyms</b>                       | xxiii |
| <b>1 Introduction and Scope</b>                         | 1     |
| 1.1 Background . . . . .                                | 3     |
| 1.2 Motivation . . . . .                                | 5     |
| 1.3 Scope of the Thesis . . . . .                       | 6     |
| 1.4 Organization of the Thesis . . . . .                | 6     |
| <b>I Source Separation</b>                              | 9     |
| <b>2 Sound Source Separation</b>                        | 11    |
| 2.1 Introduction . . . . .                              | 13    |
| 2.2 Sources and Mixtures . . . . .                      | 16    |
| 2.2.1 Audio Sources . . . . .                           | 16    |
| 2.2.2 Audio Mixtures . . . . .                          | 16    |
| 2.3 Mixing models . . . . .                             | 19    |
| 2.3.1 Instantaneous Model . . . . .                     | 20    |
| 2.3.2 Anechoic Model . . . . .                          | 21    |
| 2.3.3 Convulsive Model . . . . .                        | 22    |
| 2.3.4 Noisy models . . . . .                            | 22    |
| 2.4 Source Separation Tasks and Approaches . . . . .    | 23    |
| 2.4.1 Problem Classification . . . . .                  | 23    |
| 2.4.2 Joint and Staged Approaches . . . . .             | 24    |
| 2.5 Underdetermined Source Separation . . . . .         | 27    |
| 2.5.1 Additive Expansions . . . . .                     | 28    |
| 2.5.2 Basis decompositions . . . . .                    | 28    |
| 2.5.3 The Short-Time Fourier Transform (STFT) . . . . . | 30    |
| 2.5.4 Sparsity . . . . .                                | 33    |
| 2.5.5 Estimation of the Sources . . . . .               | 35    |
| 2.5.6 Time-Frequency Masking . . . . .                  | 38    |
| 2.6 Algorithms for Stereo Mixtures . . . . .            | 40    |
| 2.6.1 DUET . . . . .                                    | 40    |
| 2.6.2 Panning Index Window (PIW) . . . . .              | 41    |
| 2.6.3 ADReSS . . . . .                                  | 42    |
| 2.7 Monaural Separation . . . . .                       | 43    |

|           |  |            |
|-----------|--|------------|
| 2.7.1     | Non-Negative Matrix Factorization . . . . .              | 43         |
| 2.7.2     | Computational Auditory Scene Analysis . . . . .          | 45         |
| 2.8       | Performance measurement . . . . .                        | 45         |
| 2.9       | Conclusion . . . . .                                     | 48         |
| <b>3</b>  | <b>Multi-Level Thresholding Separation</b>               | <b>49</b>  |
| 3.1       | Introduction . . . . .                                   | 51         |
| 3.2       | Separation of instantaneous mixtures . . . . .           | 53         |
| 3.2.1     | Pan Map . . . . .  | 54         |
| 3.2.2     | Weighted histograms . . . . .                            | 56         |
| 3.2.3     | Thresholding . . . . .                                   | 58         |
| 3.2.4     | Efficient implementation . . . . .                       | 64         |
| 3.2.5     | Estimation of the sources . . . . .                      | 65         |
| 3.2.6     | Computational Complexity . . . . .                       | 65         |
| 3.2.7     | Performance Evaluation . . . . .                         | 66         |
| 3.3       | Separation in Real Environments . . . . .                | 71         |
| 3.3.1     | DOA map . . . . .  | 72         |
| 3.3.2     | Coherence-Based Selection . . . . .                      | 73         |
| 3.3.3     | Histogram formation . . . . .                            | 76         |
| 3.3.4     | Multi-Level Thresholding and Source Estimation . . . . . | 77         |
| 3.3.5     | Performance Evaluation . . . . .                         | 78         |
| 3.4       | Conclusion . . . . .                                     | 82         |
