Abstract	iii
Resumen	v
Resum	vii
Contents	ix
List of Figures	xii
List of Tables	xv
Chapter 1 Introduction	1
Chapter 2 State of the Art	5
2.1 Disability and Dyskinetic Cerebral Palsy	5
2.1.1. Cerebral Palsy	7
2.1.2. Dyskinetic Cerebral Palsy	10
2.2 Augmentative and Alternative Communication Systems and Languages	12
2.3 Assistive Products	15
2.3.1. Mean of access	17
2.4 Brain-Neural Computer Interfaces	21
2.5 BNCI applications	25
2.5.1. Limitations of BNCI Systems	26
2.6 Other physiological signals and sensors for AAC	28

2.7	Physiology and Emotions: affective computing	30
2.8	Conclusions after the state of the art	32
Chapter 3	Hypotheses and objectives	35
3.1	Presentation of hypothesis.	35
3.2	Objectives.	35
3.3	Work plan.	36
Chapter 4	Materials and Methods	39
4.1	Conceptual design of the ABC System.	39
4.2	Identification of ABC features.	44
4.3	Prototyping of ABC user interfaces.....	45
4.3.1	Prototype of configuration interface.....	45
4.3.1.1	<i>Physiological signals</i>	46
4.3.1.2	<i>Language</i>	47
4.3.1.3	<i>Library</i>	47
4.3.1.4	<i>Creating new elements</i>	48
4.3.1.5	<i>Item layout</i>	49
4.3.1.6	<i>Item selection</i>	50
4.3.1.7	<i>Online services</i>	51
4.3.1.8	<i>Other services</i>	51
4.3.2	Prototype of communicator.	52
4.4	Analysis and evaluation of ABC user interfaces.	55
4.5	Direct selection of elements with physiological control.	57
4.5.1	Physiological control with EMG.....	57
4.5.2	Proportional control.	58
4.5.3	Physical model control.....	59
4.5.3.1	<i>Mechanical model of one degree of freedom</i>	59
4.5.4	Physical model validation.	62
4.5.4.1	<i>Variables and factor definition for the test</i>	63
4.5.4.2	<i>Procedure</i>	65
4.5.4.3	<i>Data analysis</i>	67

Chapter 5	Results	69
5.1	Conceptual design of ABC system.....	69
5.1.1	Results of the prioritization of ABC functions.	69
5.1.2	Assessment of the user interface by DCP users.....	81
5.1.2.1	<i>General features and main interface.....</i>	<i>81</i>
5.1.2.2	<i>Communication module.</i>	<i>83</i>
5.1.2.3	<i>Health module.</i>	<i>86</i>
5.1.2.4	<i>Affective system module.</i>	<i>87</i>
5.1.2.5	<i>Satisfaction level with the different functionalities.</i>	<i>88</i>
5.1.3	Assessment of the configuration interface.....	89
5.1.3.1	<i>Ease of use and performance of the configuration interface.</i>	<i>89</i>
5.1.3.2	<i>Satisfaction questionnaire.....</i>	<i>91</i>
5.2	Results of the validation of the physiological control system.....	101
Chapter 6	Synthesis and Perspectives.....	111
6.1	Discussion	112
6.1.1	Conceptual design of the ABC System.....	112
6.1.2	Direct selection system controlled by the physical model.....	114
6.2	Conclusions	115
6.3	Valorization/Publications	116
6.4	Future work	117
Bibliography	119
Appendix A.	Online survey with professionals	139
Appendix B.	Concept Test booklet	153
Appendix C.	Diagram of the Configuration Interface.....	155
Appendix D.	Informed consent	157
Appendix E.	Experimental design.....	159
