List of Figures..... iv

List of Tables vi

Nomenclaturevii

1. Introduction 1

1.1. General Context..... 1

1.2. Motivation..... 1

1.3. Methodology..... 2

1.3.1 Literature Review Overview..... 3

1.3.2 Requirements for Industrialization..... 7

1.3.3 Wall Temperature Modeling..... 8

1.3.4 Investigation of Desired Properties 8

1.3.5 Experimental and Analytic Investigations 8

1.3.6 Novel Thermal Barrier Material Development 9

1.4. Thesis Outline 9

2. Literature Review 10

2.1. Introduction..... 10

2.2. Heat Transfer Background..... 10

2.3. Measurement and Estimation of In-Cylinder Heat Transfer 11

2.4. Spark-Ignited Combustion Background..... 14

2.5. Conventional Insulation in Literature..... 21

2.6. Temperature-Swing Insulation in Literature 30

3.	Experimental Apparatus and Methods	36
3.1.	Introduction.....	36
3.2.	Material Properties Measurement	36
3.2.1	Thermal Diffusivity.....	36
3.2.2	Heat Capacity.....	37
3.3.	Experimental Engine and Test Facilities.....	38
3.4.	Experimental Methodology	40
3.5.	Experimental Data Analysis	42
3.5.1	Initial Calculations	42
3.5.2	Crevice/Porosity Model	44
3.5.3	In-Cylinder Properties	45
3.5.4	Heat Transfer Estimation	48
3.5.5	Heat Release Calculation.....	49
3.5.6	Energy Closure.....	50
3.5.7	Knock Amplitude	52
3.6.	Heat Flux Probe.....	52
3.6.1	Probe Construction and Operation.....	53
3.6.2	Conversion to Temperature and Heat Flux	54
4.	Computational Methods.....	56
4.1.	Introduction.....	56
4.2.	0D/1D Engine Thermodynamic Model.....	56
4.2.1	Model Description.....	56
4.2.2	Calibration to Experimental Data	57
4.3.	2D Thermal Wall Model	58
4.3.1	General Model Formulation	58
4.3.2	Optimal Finite-Element Organization	63
4.3.3	Component Temperature Initialization & Solution	67
4.3.4	Wall Temperature Model Validation	68
4.3.5	Model Calibration with Experimental Data	69
4.3.6	Discussion of Thermal Wall Model	73
4.4.	Coupling Thermodynamic & Thermal Models	74

4.5.	Coupling Experimental Data Analysis & Thermal Model.....	75
4.6.	Summary and Conclusions.....	76
5.	Analytical Material Properties Investigations.....	77
5.1.	Introduction.....	77
5.2.	Fixed Thermodynamic Conditions.....	77
5.2.1	Model Formulation.....	78
5.2.2	Analysis & Results.....	78
5.3.	Variable Thermodynamic Conditions.....	84
5.3.1	Simple Engine Geometry	84
5.3.2	Realistic Engine Geometries	89
5.4.	Summary and Conclusions.....	93
6.	Conventional Materials: Experimental Investigations.....	94
6.1.	Introduction.....	94
6.2.	Conventional Insulating Materials.....	94
6.3.	Test Plan	96
6.4.	Analysis and Results	97
6.4.1	Experimental Results	97
6.4.2	Simulated Performance.....	106
6.5.	Summary and Conclusions.....	111
7.	Novel Materials: Development and Testing.....	113
7.1.	Introduction.....	113
7.2.	Material Requirements.....	113
7.3.	Material Structure and Application.....	114
7.4.	Measured Properties	117
7.5.	Experimental Results	118
7.6.	Summary and Conclusions.....	123
8.	Conclusions and Future Directions	125
8.1.	Summary and Conclusions.....	125
8.2.	Future Work and Directions	127
9.	Works Cited	128
