<b>1</b>	<b>Motivation, Objectives and Organization of the Thesis</b>	<b>1</b>
1.1	Motivation . . . . .	1
1.2	Objectives of the Thesis . . . . .	2
1.3	Organization of the Thesis . . . . .	3
<b>2</b>	<b>Vehicular Networks</b>	<b>5</b>
2.1	Introduction . . . . .	5
2.2	Advances and Trends in Vehicular Network Technologies . . . . .	6
2.3	Vehicular Networks: Rationale & Motivation . . . . .	9
2.4	Road Safety and Emergency Services . . . . .	16
2.4.1	Hazards / Accident Contributing Factors . . . . .	17
2.5	Trends in Emergency Services: From Cellular to VANET-based . . . . .	22
2.5.1	Comparison of eCall and OnStar . . . . .	24
2.6	A View on Future Emergency Services . . . . .	25
2.6.1	Data for Emergency Use in the Future . . . . .	26
2.7	Summary . . . . .	29
<b>3</b>	<b>Vehicular Ad Hoc Networks (VANETs)</b>	<b>31</b>
3.1	Introduction . . . . .	31
3.2	Characteristics and Applications of VANETs . . . . .	32
3.3	Standards for VANETs . . . . .	34
3.3.1	Wireless Access in Vehicular Environments (WAVE) . . . . .	35
3.3.2	Components of a WAVE System . . . . .	36
3.3.3	Communication Protocols . . . . .	39
3.3.4	IEEE 1609.1 . . . . .	40
3.3.5	IEEE 1609.2 . . . . .	40
3.3.6	IEEE 1609.3 . . . . .	41
3.3.7	IEEE 1609.4 . . . . .	41
3.3.8	IEEE 802.11p . . . . .	42
3.4	Existing Broadcast Storm Reduction Schemes . . . . .	43
3.4.1	Counter-based . . . . .	43
3.4.2	Distance-based . . . . .	43
3.4.3	Location-based . . . . .	44
3.4.4	Cluster-based . . . . .	44
3.4.5	Smart Gossip Scheme . . . . .	45

## CONTENTS

---

3.4.6	Weighted p-persistence, Slotted 1-persistence, and Slotted p-persistence . . . . .	45
3.4.7	The Last One (TLO) Scheme . . . . .	45
3.5	Dissemination of Warning Messages in VANETs . . . . .	46
3.6	Summary . . . . .	47
<b>4</b>	<b>Simulation of VANETs</b> . . . . .	<b>49</b>
4.1	Introduction . . . . .	49
4.2	Mobility Models in VANETs . . . . .	50
4.2.1	Factors Affecting Realistic Motion Patterns in VANETs . . . . .	52
4.2.2	Mobility Models' Classification . . . . .	54
4.2.2.1	Synthetic Models . . . . .	55
4.2.2.2	Survey-based Models . . . . .	58
4.2.2.3	Trace-based Models . . . . .	59
4.2.2.4	Traffic Simulators-based Models . . . . .	60
4.2.3	Road Topology in Mobility Simulation . . . . .	60
4.2.4	Validation of Mobility Models . . . . .	61
4.3	Overview of VANET Simulators . . . . .	65
4.3.1	VANET Mobility Generators . . . . .	66
4.3.1.1	Vehicular Traffic Models . . . . .	66
4.3.1.2	Existing Mobility Generators . . . . .	67
4.3.2	Network Simulators . . . . .	68
4.3.2.1	Existing Network Simulators . . . . .	69
4.3.2.2	Comparison of Network Simulators . . . . .	70
4.3.3	VANET Simulators . . . . .	70
4.3.3.1	Existing VANET Simulators . . . . .	71
4.3.3.2	Comparison of VANET Simulators . . . . .	75
4.4	Radio Propagation Models . . . . .	75
4.4.1	Existing Radio Propagation Models . . . . .	77
4.4.1.1	Free Space . . . . .	77
4.4.1.2	Two-Ray Ground . . . . .	77
4.4.1.3	Ricean and Rayleigh Fading . . . . .	78
4.4.1.4	Shadowing . . . . .	79
4.4.1.5	RPMO . . . . .	80
4.4.1.6	Nakagami Model . . . . .	81
4.4.1.7	Mahajan et al. . . . .	81
4.4.2	Limitations of Existing Attenuation Schemes . . . . .	82
4.4.3	Visibility Schemes . . . . .	83
4.4.3.1	Visibility Scheme for Real Maps . . . . .	85
4.5	Methodology and Metrics . . . . .	88
4.6	Summary . . . . .	89
<b>5</b>	<b>Determining the Key Factors in VANETs</b> . . . . .	<b>91</b>
5.1	Introduction . . . . .	91
5.2	Related work . . . . .	92
5.3	The 2k Factorial Analysis . . . . .	93
5.3.1	Calculating the Effects of the Factors . . . . .	95

5.4	Factors to Study in VANETs . . . . .	96
5.4.1	Number of Warning Vehicles . . . . .	96
5.4.2	Number of Vehicles . . . . .	96
5.4.3	Channel Bandwidth . . . . .	96
5.4.4	Broadcast Scheme . . . . .	97
5.4.5	Radio Propagation Model . . . . .	98
5.4.6	Message Periodicity . . . . .	98
5.4.7	Speed of Vehicles . . . . .	98
5.4.8	Transmission Range . . . . .	99
5.5	Factors Determination Using 2k Factorial Analysis . . . . .	99
5.5.1	Evaluating the Impact of the Transmission Range . . . . .	100
5.5.2	Evaluating the Impact of the Radio Propagation Model . . . . .	100
5.5.3	Evaluating the Impact of the Number of Vehicles . . . . .	103
5.5.4	Lessons Learnt and Guidelines for Future Research . . . . .	104
5.6	Summary . . . . .	106
<b>6</b>	<b>Improved Mobility Models for Vehicular Networks</b>	<b>109</b>
6.1	Introduction . . . . .	109
6.2	Proposed Mobility Environment . . . . .	109
6.2.1	CityMob v.1 Mobility Generator . . . . .	110
6.2.1.1	CityMob's v.1 features . . . . .	111
6.2.1.2	Installation and operation . . . . .	112
6.2.2	CityMob v.2 Mobility Generator . . . . .	114
6.2.3	Proposed SUMO-based Mobility Environment . . . . .	114
6.3	Qualitative Comparison of Mobility Generators . . . . .	115
6.4	Performance Comparison of Mobility Generators . . . . .	117
6.5	Summary . . . . .	119
<b>7</b>	<b>Improved Radio Propagation Models for Vehicular Networks</b>	<b>123</b>
7.1	Introduction . . . . .	123
7.2	Proposed Radio Propagation Models . . . . .	124
7.2.1	Distance Attenuation Model (DAM) . . . . .	124
7.2.2	Building Model (BM) . . . . .	125
7.2.3	Building and Distance Attenuation Model (BDAM) . . . . .	125
7.2.4	Real Attenuation and Visibility (RAV) model . . . . .	125
7.2.4.1	RAV Attenuation Scheme . . . . .	126
7.2.4.2	RAV Visibility Scheme . . . . .	129
7.2.4.3	Summary of RAV operation . . . . .	132
7.3	Simulation Results . . . . .	132
7.3.1	Manhattan-based RPMs Evaluation . . . . .	132
7.3.1.1	Reference Scenario for the proposed Manhattan-based RPMs . . . . .	134
7.3.1.2	Varying the Number of Vehicles . . . . .	134
7.3.1.3	Varying the Building Size . . . . .	138
7.3.1.4	Overall Summary for the proposed Manhattan-based RPMs . . . . .	138
7.3.2	RAV Model Evaluation . . . . .	141

## CONTENTS

---

7.3.2.1	Evaluating the impact of the RAV model versus other existing radio propagation models . . . . .	141
7.3.2.2	Evaluating the impact of vehicle density and simulation scenario . . . . .	146
7.4	Summary . . . . .	151
<b>8</b>	<b>Efficient Message Dissemination in Vehicular Networks</b>	<b>153</b>
8.1	Introduction . . . . .	153
8.2	SBR: the Proposed Broadcast Storm Reduction Algorithm . . . . .	154
8.3	Formal Description of the SBR Algorithm . . . . .	158
8.3.1	Definition of the Available Sets . . . . .	158
8.3.2	Definition of the Different Functions . . . . .	158
8.3.2.1	Functions to Operate with Vehicles . . . . .	159
8.3.2.2	Functions to Operate with Streets . . . . .	159
8.3.2.3	SBR Formal Definition . . . . .	160
8.4	SBR Simulation Results in Manhattan-based Scenarios . . . . .	162
8.5	The Street Broadcast Reduction (SBR) Scheme in Real Map Scenarios	163
8.6	Simulation Results Obtained for the SBR in Real Maps . . . . .	166
8.7	Summary . . . . .	171
<b>9</b>	<b>Conclusions, Publications and Future Work</b>	<b>173</b>
9.1	Publications Related to the Thesis . . . . .	174
9.1.1	Journals . . . . .	174
9.1.2	Indexed Conferences . . . . .	176
9.1.3	International Conferences . . . . .	178
9.1.4	National Conferences . . . . .	179
9.2	Future work . . . . .	180
