

# Thesis Index

<b>1 Introduction</b> .....	<b>1</b>
1.1 Background and motivations .....	1
1.2 Objectives .....	4
1.3 Outline .....	5
Bibliography .....	6
<b>2 Combustion process in a direct injection diesel spray</b> .....	<b>8</b>
2.1 Introduction .....	8
2.2 Overview of conventional diesel combustion process .....	9
2.3 Diesel spray under quiescent conditions .....	12
2.3.1 Atomization .....	12
2.3.2 Fuel-air mixing and evaporation .....	15
2.3.3 Auto-ignition .....	21
2.3.4 Mixing-controlled combustion .....	25
2.4 Split-injections .....	34
2.5 Summary and conclusions .....	37
Bibliography .....	37
<b>3 Tools and Methodology</b> .....	<b>48</b>
3.1 Introduction .....	49
3.2 Experimental facilities .....	49
3.2.1 High-pressure High-temperature vessel .....	49
3.2.2 Two-stroke optical engine .....	52
3.3 Optical techniques applied for spray combustion analysis .....	53
3.3.1 High-speed Schlieren imaging .....	54
3.3.2 Ultraviolet light absorption (UV-LA) .....	55
3.3.3 OH Chemiluminescence .....	56

3.4 Diffuse Back-Illumination (DBI) extinction imaging technique for flame soot quantification .....	57
3.4.1 Fundamentals .....	58
3.4.2 Test matrix .....	60
3.4.3 Optical setup .....	61
3.4.4 Validation of DBI with LEM .....	66
3.4.5 Comparison between DBI and 2-color method .....	66
3.4.6 A combined extinction-radiation soot diagnostic .....	69
3.5 1D spray model .....	72
3.A Appendix A: Simplified expansion for a uniform density spray .....	75
Bibliography .....	77
<b>4 Spray Dynamics and Soot Production under Quiescent Conditions .....</b>	<b>80</b>
4.1 Introduction .....	80
4.2 Optical setup .....	81
4.3 Test Matrix .....	83
4.4 A study on reacting spray dynamics .....	85
4.4.1 Analysis under baseline Spray A conditions .....	85
4.4.2 Parametric analysis .....	95
4.5 A study on soot production by combining extinction and radiation .....	105
4.5.1 Analysis of diagnostic sensitivity and uncertainty .....	105
4.5.2 Parametric analysis .....	113
4.6 Summary and conclusions .....	124
Bibliography .....	126
<b>5 Spray Characteristics under Non-quiescent Conditions .....</b>	<b>128</b>
5.1 Introduction .....	128
5.2 Optical setup .....	129

5.3 Test matrix and experimental methodology . . . . .	131
5.4 Study on single-injection under non-quiescent conditions . . . . .	134
5.4.1 Non-Reacting Spray Analysis . . . . .	134
5.4.2 Reacting Spray Analysis . . . . .	142
5.5 Study on Split-injection under non-quiescent conditions . . . . .	149
5.5.1 Non-reacting spray analysis . . . . .	149
5.5.2 Reacting spray analysis . . . . .	158
5.6 Summary and conclusions . . . . .	165
Bibliography . . . . .	167
<b>6 Conclusions and Future Work . . . . .</b>	<b>169</b>
6.1 Conclusions . . . . .	169
6.1.1 Spray Dynamics and Soot production under Quiescent Conditions . . . . .	170
6.1.2 Spray Dynamics and Soot production under Non-Quiescent Conditions . . . . .	171
6.2 Future Work . . . . .	172
Bibliography . . . . .	175
